

2019 ANNUAL MOBILITY REPORT

The **Annual Mobility Report** provides valuable travel trends for the North Florida TPO's Congestion Management Process.

North Florida
Transportation Planning Organization
PLAN • FUND • MOBILIZE

Why we do this

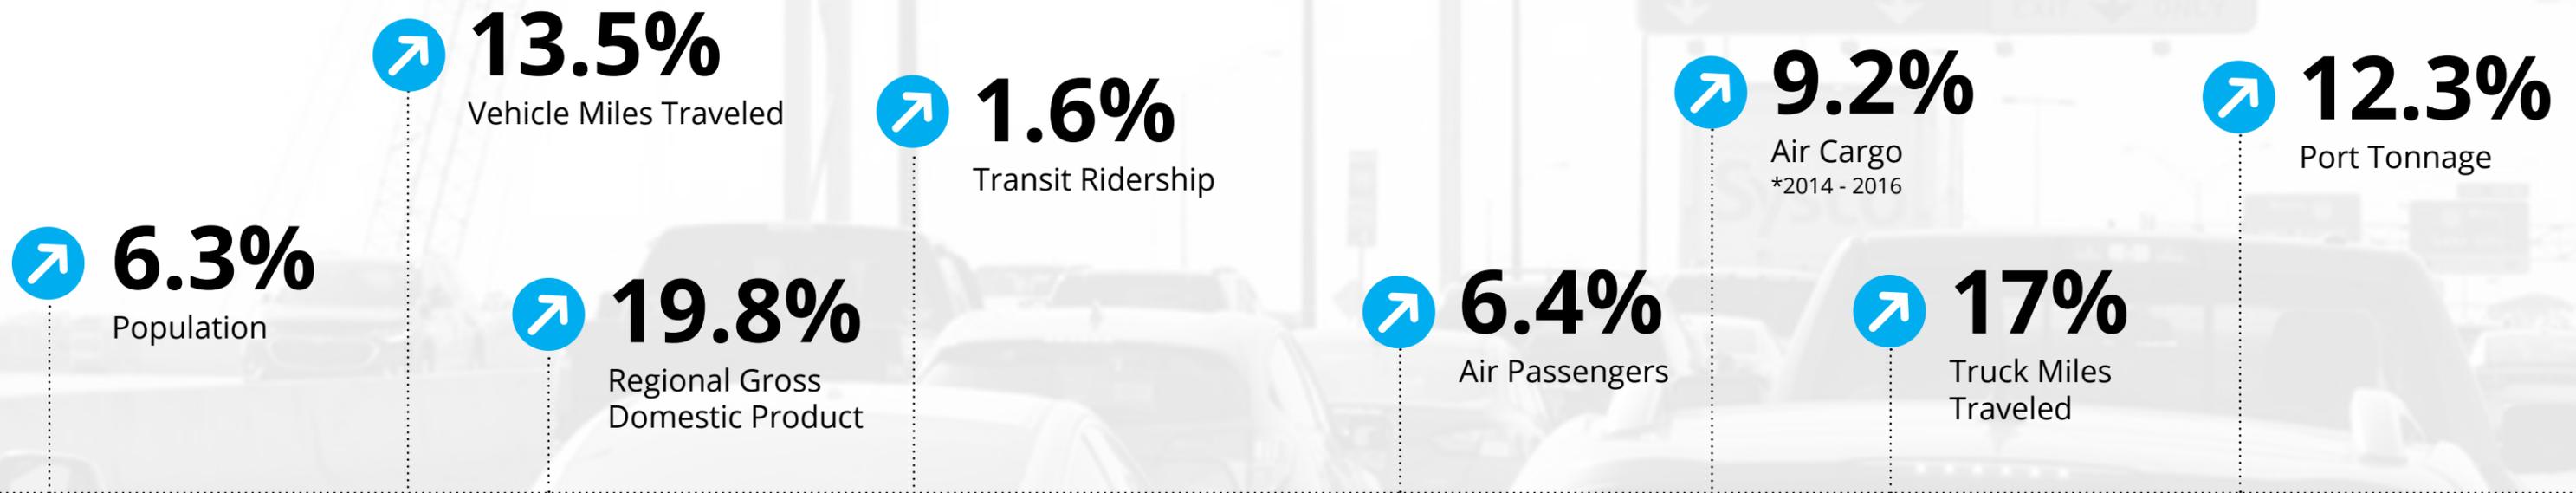

This process informs transportation studies, planning and programming for the region. The data measures changes from 2014-2017, the most recent three-year trends available, unless otherwise noted.

Robust growth continues in our region, particularly in the freight sector, and is accompanied by expected increases in travel volumes and congestion.

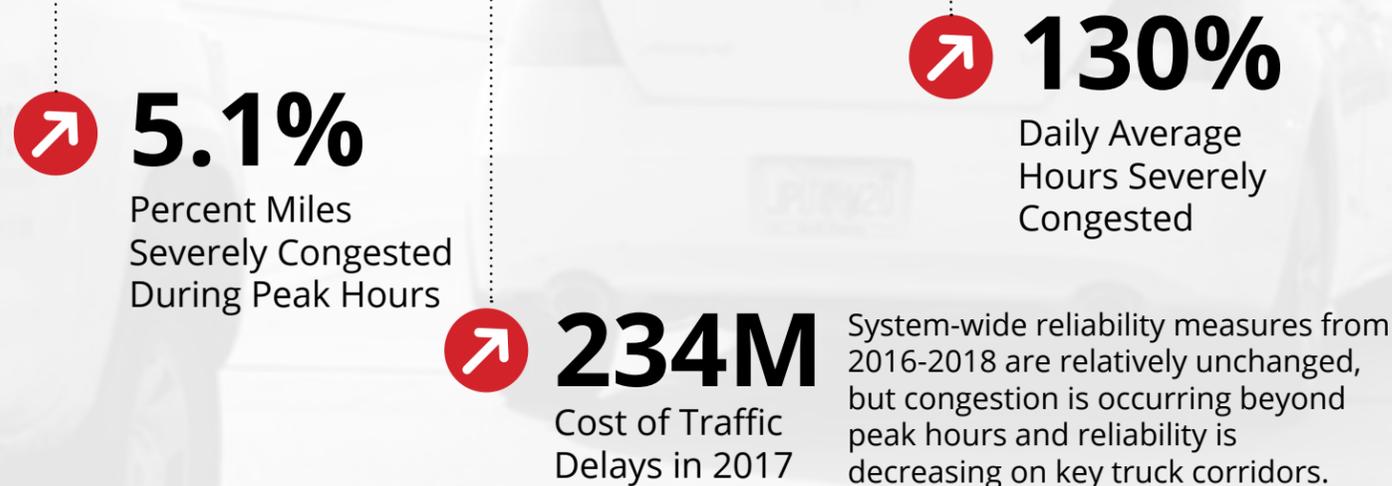

Safety continues to be a challenge. Crashes are growing at a rate less than the growth in vehicle-miles traveled, which is an improvement.

Overall congestion and the reliability of travel time on our major corridors continues to worsen with the growth in vehicle-miles traveled.

TRACKING TRENDS

Mobility and congestion management data is available to the public in the Smart North Florida Integrated Data Exchange at SmartNorthFloridaData.com. A congestion management data visualization dashboard is available to easily track and share trends.

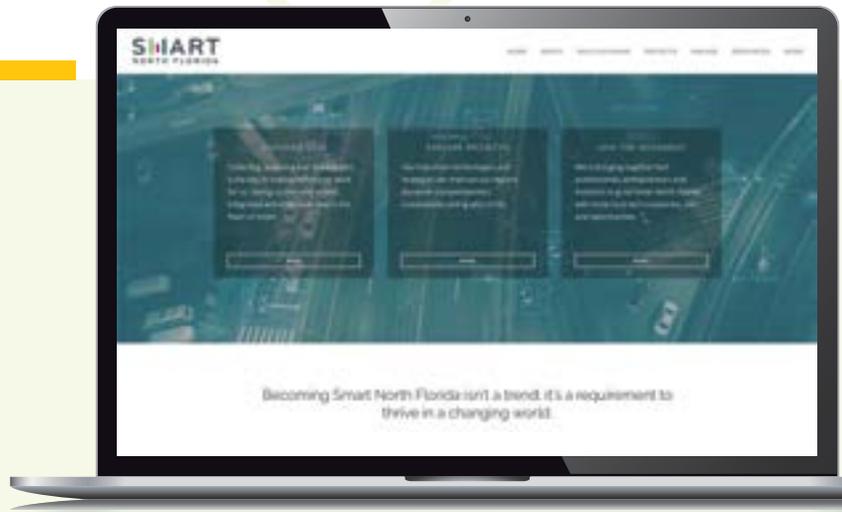

SHORT AND LONG TERM MOBILITY SOLUTIONS

The North Florida TPO's Transportation Improvement Program for fiscal years 2019/20 to 2023/24 contains \$3.7 billion in road, transit, airport, seaport, bicycle and pedestrian projects to support the safe, efficient movement of people and goods throughout our region. The Long Range Transportation Plan reflects planned development and future growth needs out to the year 2045.

The North Florida TPO Regional Strategic Safety Plan identifies safety issues, preferred strategies and funding priorities. Technology plays a critical role in improving our transportation system.

The Smart North Florida initiative (smarthnorthflorida.com) includes smart technologies and strategies to improve our region's economic competitiveness, sustainability and quality of life.
