

Appendix A
Crash Data Summary
Florida State Highway System (SHS) and Local Roadway Crashes

Description of Crash Types

Issue 1: Aggressive Driving Behavior Crashes

The “aggressive driving behavior” crash classification includes the following seven categories. The numbers listed inside the braces represent the “Contributing Cause” classification codes identified in the Crash Analysis Reporting (CAR) System:

1. Failed to yield right-of way (03)
2. Improper lane change (05)
3. Following too closely (10)
4. Exceeded safe speed limit (12)
5. Improper passing (15)
6. Exceeded stated speed limit (17)
7. Disregarded other traffic control (20)

In addition to the seven issues mentioned above, the following two categories were also analyzed as aggressive driving behavior for the purpose of this report, but can be potentially listed as a separate issue called “Distracted Driving”.

1. Careless driving (02)
2. Disregarded traffic control (signal (11) or stop (13))

Appendix B illustrates the North Florida regional map showing the aggressive driving behavior, careless driving, and disregarded traffic control crash severity that occurred in the past six years.

Issue 2: Intersection Crashes

The “intersection crash” classification includes the following two categories. The numbers listed inside the braces represent the “Site Location” classification codes identified in the Crash Analysis Reporting (CAR) System:

1. At intersection (02)
2. Influenced by intersection (03)

Appendix B illustrates the North Florida regional map with the intersection crash severity in the past six years.

Issue 3: Vulnerable Road Users Crashes

The “vulnerable road user crash” classification includes the following four categories. The numbers listed inside the braces represent the “Harmful Event” classification codes identified in the Crash Analysis Reporting (CAR):

1. Collision with pedestrian (10)
2. Collision with bicycle (11)
3. Collision with bicycle in bike lane (12)
4. Collision with moped (13)

Appendix B shows the North Florida regional map with vulnerable road user crash severity in the past six years.

Issue 4: Lane Departure Crashes

The “lane departure crash” classification includes the following 16 categories. The numbers listed inside the braces represent the “Harmful Event” classification codes identified in the Crash Analysis Reporting (CAR) System:

1. Collision with motor vehicle in transport (head on) (02)
2. Collision with motor vehicle in transport (angle) (03)
3. Collision with motor vehicle in transport (sideswipe) (06)
4. Collision with parked car (08)
5. Motor vehicle hit sign/sign post (16)
6. Motor vehicle hit utility pole/light pole (17)
7. Motor vehicle hit guardrail (18)
8. Motor vehicle hit tree/shrubbery (22)
9. Collision with construction barricade sign (23)
10. Collision with crash attenuators (25)
11. Motor vehicle hit other fixed object (27)
12. Collision with moveable object on road (28)
13. Motor vehicle ran into ditch/culvert (29)
14. Ran off the road into water (30)
15. Overturned (31)
16. Median crossover (39)

Appendix B shows the North Florida regional map with the lane departure crash severity in the past six years.

Issue 5: Impaired Driving Crashes

The “impaired driving crash” classification includes the following three categories. The numbers listed inside the braces represent the “Alcohol/Drugs Involved” classification codes identified in the Crash Analysis Reporting (CAR) System:

1. Alcohol involved (01)
2. Drug involved (02)
3. Alcohol and drug involved (03)

Appendix B shows the North Florida regional map with the impaired driving crash severity in the past six years.

Issue 6: Young Driver Crashes

The “young driver crash” classification includes the drivers in the age group of 15 to 20 years of age.

Appendix B shows the North Florida regional map for the young driver crash severity in the past six years.

Issue 7: Elderly Driver Crashes

The “elderly driver crash” classification includes the drivers in the age group of 65 years or older.

Appendix B shows the North Florida regional map for the elderly driver crashes in the past six years.

Overall Crash Data Summary

State Roads

Year	PDO	Injury	Fatality	Total Crashes	Crash Cost	VMT (in 1,000)	Crash Rate
