

### TRANSPORTATION IMPROVEMENT PROGRAM 2023/24 - 2027/28

NORTH FLORIDA
TPC

**Draft April 2023** 

#### **Table of Contents**

Section I - Executive Summary	I-1
Section II - 5 Year Summary by Fund Code	II-1
Section III - Funding Source Summary	III-1
Section A - Duval County State Highway Projects (FDOT)	A-1
Section B - Duval County State Highway / Transit Projects (JTA)	B-1
Section C - Duval County Aviation Projects	C-1
Section D - Duval County Port Projects	D-1
Section E - St. Johns County State Highway / Transit Projects (FDOT)	E-1
Section F - St. Johns County Aviation Projects	F-1
Section G - Clay County State Highway / Transit / Aviation Projects (FDOT)	G-1
Section H - Nassau County State Highway / Aviation / Port Projects (FDOT)	H-1
Section I - Area-Wide Projects	I-1
Section J - Amendments	J-1
Section A1 - Abbreviations and Acronyms (Appendix I)	A1-1
Section A2 - Path Forward 2045 LRTP Master Project List (Appendix II)	A2-1
Section A3 - Path Forward 2045 LRTP Goals and Objectives (Appendix III)	A3-1
Section A4 - 2022 List of Priority Projects (Appendix IV)	A4-1
Section A5 - Federal Obligation Reports (Appendix V)	A5-1
Section A6 - Public Comments (Appendix VI)	A6-1
Section A7 - 2045 Cost Feasible Plan YOE Total Project Cost (Appendix VII)	A7-1
Section A8 - Transportation Disadvantaged (Appendix VIII)	A8-1
Section A9 - FHWA Eastern Federal Lands Highway Division (Appendix IX)	A9-1
Section A10 – Transportation Performance Measures (Appendix X	A10-
Section PI - Project Index	PI-1

# SECTION I Executive Summary

## SECTION II 5 Year Summary by Fund Code

Project #	Project Name	2023/24	2024/25	2025/26	2026/27	2027/28	Total

# **APPENDIX III**

**Path Forward Goals and Objectives** 

# Path Forward 2045 Goals, Objectives, and Policies

It is North Florida Transportation Planning Organization's (TPO's) mission is to provide a regional forum for developing a transportation system that moves people and goods safely, economically and efficiently while maintaining a high quality of life in North Florida. The TPO's vision is to promote the regional optimization of mobility consistent with the values of local communities through the Long Range Transportation Plan (LRTP). The LRTP indicates the transportation improvements necessary for optimal movement of people and goods, based on current needs and forecasted future growth. The recommended transportation improvement projects in the plan are guided by defined goals, objectives, and performance measures.

Specifically, the LRTP goals and objectives are to enhance the following:

- Economic Competitiveness
- Livability
- Safety
- Mobility and Accessibility
- Equity in Decision Making
- System Preservation
- Resilient Multimodal Infrastructure
- Tourism Transport Management

The goals, objectives, and performance measures proposed are based on the transportation user's point of view as explained in the document below. The order of the goals and objectives do not indicate priority.

# GOAL I: INVEST IN PROJECTS THAT ENHANCE ECONOMIC COMPETITIVENESS

Investing in projects that enhance economic competitiveness focusing on improving the following: travel time reliability (the most important factor for freight operators), enhance access to jobs, and maximizing return on investment.

The objectives associated with this enhancing economic competitiveness are listed below.

# • OBJECTIVE I.I: Improve travel reliability on major freight routes.

Performai	nce Measure	Benchmark		
1.1.1	Truck Travel Time Reliability	Maintain or improve Truck Travel Time		
	The sum of maximum Truck	Reliability		
	Travel Time Reliability (TTTR) for	Calculation is only available on corridors with		
	each reporting segment, divided	Blue Toad devices		
	by the total Interstate System	(I-10, I-95, SR 10, SR 21, SR 200, US 17, US		
	miles	90, SR 13, I-295, US 1)		
		Existing values are reported in the		
		Congestion Management Process.		

# • OBJECTIVE 1.2: Enhance access to jobs, services, and retail for all.

Performance Measure		Benchmark	
1.2.1	Jobs within a half mile of a major	Maintain or improve access to jobs	
	arterial	Existing value is reported in the Congestion	
		Management Process.	
1.2.2	Projects that enhance access to	Evaluation of projects/scenarios	
	jobs through transit		

# • OBJECTIVE 1.3: Maximize return on investment.

Performance Measure		Benchmark
1.3.1	Benefit/Cost ratio	Rank benefit to cost ratio in evaluation of
		projects/scenarios
1.3.2	Return on Investment	Rank return on investment in evaluation of
		projects/scenarios

## **GOAL 2: INVEST IN LIVABLE AND SUSTAINABLE COMMUNITIES**

There is no single definition of what constitutes a "livable" or "sustainable" transportation system. However, the North Florida TPO has adopted the following definition of a sustainable transportation system endorsed by the Transportation Research Board Sustainable Transportation Indicators Subcommittee:

Allows the **basic access** and development needs of individuals, companies, and society to be met **safely** and in a manner consistent with **human and ecosystem health** and **promotes equity** within and between successive generations.

Is **affordable**, operates fairly and **efficiently**, offers a **choice of transportation modes**, and supports a **competitive economy**, as well as **balanced regional development**.

**Limits air, water, noise emissions, waste and resource use**. Limits emissions and waste within the planet's ability to absorb them, uses renewable resources at or below their rates of generation, and uses non-renewable resources at or below the rates of development of renewable substitutes, while minimizing the impact on the use of land and the generation of noise.

The goals associated with livability and sustainability are listed below.

OBJECTIVE 2.1: Enhance transit accessibility.

Performa	ance Measure	Benchmark		
2.1.1	Percent of Population within a quarter mile walk of a transit stop	Maintain or improve the percent of population within a quarter mile walk of a transit stop. Existing value is reported in the Congestion Management Process.		
2.1.2	Population within 5 miles of park and ride lots	Maintain or improve the population within 5 miles of park and ride lots. Existing value is reported in the Congestion Management Process.		

OBJECTIVE 2.2: Enhance transit ridership.

Performance Measure		Benchmark
2.2.1	Passengers per vehicle revenue	Maintain or improve passengers per revenue
	mile	mile.
		Existing value is reported in the Congestion
		Management Process.
2.2.2	Passengers per vehicle revenue	Maintain or improve passengers per revenue
	hour	hour.
		Existing value is reported in the Congestion
		Management Process.

### • **OBJECTIVE 2.3:** Enhance bicycle and pedestrian quality of service.

Performance Measure		Benchmark
2.3.1	Lane miles with bicycle and pedestrian facilities	Maintain or improve lane miles with bicycle and pedestrian facilities.
		Existing values are reported in the Congestion Management Process.

#### • OBJECTIVE 2.4: Reduce the cost of congestion per capita.

Performance Measure		Benchmark
2.4.1	Cost of congestion	Maintain or reduce the cost of congestion. Existing value is reported in the Congestion Management Process.
2.4.2	Congestion cost per capita	Maintain or reduce congestion cost per capita. Existing value is reported in the Congestion Management Process.

#### • OBJECTIVE 2.5: Reduce the impacts of investments on the natural environment.

Performance Measure		Benchmark
2.5.1	Environmental screening and	Apply Efficient Transportation Decision
	mitigation	Making Process to all projects in LRTP.

#### • OBJECTIVE 2.6: Reduce emissions from automobiles.

Performance Measure		Benchmark
2.6.1	Carbon dioxide, nitrous oxides, and volatile organic compound emissions due to reduced delay.	Estimate emission reduction due to reduced delay in the evaluation of projects/scenarios. Existing value is reported in the Congestion Management Process.
2.6.2	Emissions due to vehicle electrification	Estimate emission reduction due to electrification of the vehicle fleet.

The TPO has an Alternative Fuels Master Plan and a Clean Fuels Program promoting alternative fuels and alternative fuel vehicles.

#### • OBJECTIVE 2.7: Ensure consistency with land use planning.

Performance Measure	Benchmark

2.7.1	Includes active transportation	Include walkability standards in context
	design principles in context	sensitive solutions.
	sensitive solutions	
2.7.2	Land Use scenarios are consistent	Ensure consistency with comprehensive
	with county comprehensive plans	plans.

• OBJECTIVE 2.8: Support regional evacuation needs.

Performance Measure		Benchmark
2.8.1	Projects that improve evacuation	Evaluation of projects/scenarios.
	routes.	

• OBJECTIVE 2.9: Support micro transit, mobility as a service (MaaS) and other new and innovative transit options

#### **GOAL 3: ENCOURAGE SAFE AND SECURE TRAVEL**

Investing in projects that enhance safety will lead to reduced crashes and lower crash severity for all modes.

• OBJECTIVE 3.1: Reduce crashes for all modes.

Perform	ance Measure	Benchmark
3.1.1	Number of vehicle crashes	Reduce the number of vehicle crashes.
		Existing value is reported in the Congestion
		Management Process.
3.1.2	Crash rate per million vehicle	Reduce the crashes rate.
	miles	Existing value is reported in the Congestion
		Management Process.
3.1.3	Number of serious injuries	Reduce the crashes rate.
		Existing value is reported in the Congestion
		Management Process.

3.1.4	Rate of serious injuries per million	Reduce the number of serious injuries.
	vehicle miles	Existing value is reported in the Congestion
		Management Process.
3.1.5	Number of non-motorized	Reduce the number of non-motorized
	fatalities and non-motorized	fatalities and non-motorized serious injuries.
	serious injuries	Existing value is reported in the Congestion
		Management Process.
3.1.6	Number of bicycle crashes	Reduce the number of bicycle crashes.
		Existing value is reported in the Congestion
		Management Process.
3.1.7	Number of pedestrian crashes	Reduce the number of pedestrian crashes.
		Existing value is reported in the Congestion
		Management Process.

• OBJECTIVE 3.2: Reduce fatal crashes for all modes.

Performance Measure		Benchmark
3.2.1	Number of fatalities	Reduce the number of fatalities.
		Existing value is reported in the Congestion
		Management Process.
3.2.2	Fatality rate per million vehicle	Reduce the fatality rate.
	miles	Existing value is reported in the Congestion
		Management Process.
3.2.3	Number of bicycle fatalities	Reduce the number of bicycle fatalities.
		Existing value is reported in the Congestion
		Management Process.
3.2.4	Number of pedestrian fatalities	Reduce the number of pedestrian fatalities.
		Existing value is reported in the Congestion
		Management Process.

• OBJECTIVE 3.3: Promote the implementation of safety and security improvements in the design or retrofit of all transportation systems.

Performance Measure		
3.3.1	Implemented safety measures on high crash corridors identified in the Regional Strategic Safety Plan.	Reported in the Regional Strategic Safety Plan.

• OBJECTIVE 3.4: Enhance security for all modes through the appropriate use of authorized access, surveillance systems and Intelligent Transportation Systems (ITS).

Performance Measure			
3.4.1 All transit projects are required to A Threat and Vulnerabilit		A Threat and Vulnerability Assessment	
		have a Threat and Vulnerability	considers the full spectrum of threats
		Assessment.	(natural, criminal, terrorist, accidental, etc)

for a given facility/location as well as the vulnerability of the facility/location to an
attack.

#### **GOAL 4: ENHANCE MOBILITY AND ACCESSIBILITY**

Enhancing mobility includes addressing the four dimensions of mobility – quantity of travel, quality of travel, system accessibility and system utilization. Several of these measures also support other goals and objectives (such as livability and sustainability).

Mobility is about more than increasing the volume of persons served and managing congestion. Users want a less stressful commute, but they also want improved reliability of their travel, more choices including transit, walking, and bicycling and to ensure we optimize system operations before we invest in new infrastructure. Understanding the trade-offs of these goals in the context of each corridor being considered is an essential element to identifying the right mobility solution for any project.

#### OBJECTIVE 4.1: Optimize the quantity of travel.

Perform	nance Measure	Benchmark
4.1.1	Vehicle-miles traveled	Generally, increases in the quantity traveled
4.1.2	Person-miles traveled	(throughout) are preferred. However,
4.1.3	Truck-miles traveled	consistent with livability and sustainability
4.1.4	Vehicle Occupancy	goals, one objective is to reduce the amount of travel needed. Therefore, no benchmarks are proposed, but monitoring is recommended.  Existing values are reported in the Congestion Management Process.
4.1.5	Transit ridership	Increase transit ridership Existing values are reported in the Congestion Management Process.

#### OBJECTIVE 4.2: Optimize the quality of travel.

Performance Measure		Benchmark
4.2.1	Average Travel Speed	Maintain or improve the average travel speed Existing value is reported in the Congestion Management Process.

4.2.2	Average Vehicle Delay	Maintain or reduce the average vehicle delay
		Existing value is reported in the Congestion
		Management Process.
4.2.3	Average Commute Time	Maintain or reduce the average commute
		time
		Existing value is reported in the Congestion
		Management Process.

Performa	nce Measure	Benchmark
4.2.4	Interstate Level of Travel Time Reliability - Percent of person-miles traveled on the Interstate that are Reliable	Maintain or improve the Interstate Level of Travel Time Reliability. Calculation is only available on corridors with Blue Toad devices
		(I-10, I-95, I-295) Existing values are reported in the Congestion Management Process.
4.2.5	Non-Interstate Level of Travel Time Reliability - Percent of person-miles traveled on the Non-Interstate that are Reliable	Maintain or improve the Non-Interstate Level of Travel Time Reliability. Calculation is only available on corridors with Blue Toad devices (SR 10, SR 21, SR 200, US 17, US 90, SR 13, US 1) Existing values are reported in the Congestion Management Process.
4.2.5	Level of service on rural facilities	Maintain the level of service standard (FDOT standard for Strategic Intermodal System facilities and local government standards for other facilities) Existing values are reported in the Congestion Management Process.

#### • **OBJECTIVE 4.3:** Improve the accessibility to mode choices.

Performance Measure		Benchmark
4.3.1	Percent of system miles with bicycle accommodations	Maintain or improve the percent of system miles with bicycle accommodations.  Existing value is reported in the Congestion Management Process.

4.3.2	Percent of system miles with	Maintain or improve the percent of system
	pedestrian accommodations	miles with pedestrian accommodations.
		Existing value is reported in the Congestion
		Management Process.
4.3.3	Transit coverage –	Increase the percent of population within
	Percent of population within	quarter mile of a transit route.
	quarter mile of a transit route	Existing value is reported in the Congestion
		Management Process.

#### • **OBJECTIVE 4.4:** Optimize the utilization of the system.

Performa	Performance Measure Benchmark	
4.4.1	Percent of system heavily	Maintain or reduce the percent of system
	congested	heavily congested.
		Existing value is reported in the Congestion
		Management Process.
4.4.2	Percent of travel heavily	Maintain or reduce the percent of travel
	congested	heavily congested.
		Existing value is reported in the Congestion
		Management Process.
4.4.3	Vehicles per lane mile	Optimize the vehicles per lane mile for a
		desired LOS
		Existing value is reported in the Congestion
		Management Process.
4.4.4	Duration of congestion	Maintain or reduce the duration of
		congestion
		Existing value is reported in the Congestion
		Management Process.
4.4.5	Transit average load (Passengers	Optimize the transit average load for a
	per transit vehicle)	desired quality of service
		Existing value is reported in the Congestion
		Management Process.

### GOAL 5: ENHANCE EQUITY IN DECISION MAKING

Enhancing equity in decision making emphasizes the principle of 'Environmental Justice'. The United States Environmental Protection Agency (EPA) defines Environmental Justice as follows.

Environmental Justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies. EPA has this goal for all communities and persons across this Nation [sic]. It will be achieved when everyone enjoys the same degree of protection from environmental and health hazards and equal access to the decision-making process to have a healthy environment in which to live, learn, and work.

Additionally, the United States Department of Transportation defines three fundamental Environmental Justice principles for the Federal Highway Administration and the Federal Transit Administration as follows:

- 1. To avoid, minimize, or mitigate disproportionately high and adverse human health and environmental effects, including social and economic effects, on minority populations and low-income populations.
- 2. To ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
- 3. To prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority and low-income populations.

To address these goals, these three principles are adopted as objectives for this LRTP listed below. The performance measures associated with each objective are less quantifiable than the objectives associated with other goals and are more process oriented. These three factors will be considered as part of the Needs Plan and Cost Feasible Plan and will be implemented using Geographic Information Systems techniques to identify the minority and low-income populations and by designing outreach programs to involve minority and low-income populations.

OBJECTIVE 5.1: Avoid, minimize, or mitigate disproportionately high and adverse human health and environmental effects
(including social and economic effects) on minority and low-income populations.

The performance of this objective is qualitative.

OBJECTIVE 5.2: Ensure full and fair participation by all potentially affected communities in the transportation decision-making process.

Performance Measure		

	Adherence to the Public Involvement Plan
15/1	LAdharanca to tha Public Involvament Plan
J.Z. I	Adherence to the rabile involvement rian

• OBJECTIVE 5.3: Prevent the denial of, reduction in, or significant delay of the receipt of benefits by minority and low-income populations.

Performance Measure		Benchmark
5.3.1	Number of projects in low income	Evaluation of projects/scenario
	and minority census tracts	

#### OBJECTIVE 5.4: Provide Ladders of Opportunity.

Performance Measure		Benchmark
5.4.1	Number of projects in low income and minority census tracts	Evaluation of projects/scenario
5.4.2	Jobs within a half mile of a state road	Maintain or improve access to jobs Existing value is reported in the Congestion Management Process.
5.4.3	Projects that enhance access to jobs through transit	Evaluation of projects/scenarios

#### **GOAL 6: PRESERVE AND MAINTAIN OUR EXISTING SYSTEM**

Preserving and maintaining the existing system is integral to the optimization of mobility. The Federal Highway Administration (FHWA) and Florida Department of Transportation (FDOT) established formal goals and objectives for systems preservation that are proposed for adoption as part of this LRTP. They include:

- 1. Have 95 percent of the Strategic Intermodal System in good or better condition.
- 2. Have 85 percent of other arterials in good or better condition.
- 3. Strengthen bridges that are either (I) structurally deficient or (2) posted for weight restriction within six years on FDOT facilities.
- 4. Replace bridges that require structural repair and are more cost effective to replace within nine years on FDOT facilities.
- 5. Satisfy FDOT's off system bridge replacement goals.
- 6. Maintain signing and pavement markings to accommodate all users including automated vehicles.

7. Maintain technology/infrastructure introduced to accommodate connected vehicles.

In addition, the objective of the systems preservation and maintenance goal is to provide a transit fleet that meets Federal Transit Administration's (FTA's) requirements for system preservation, vehicle age and maintenance.

The objectives for preserving and maintaining the existing system are listed below.

#### • OBJECTIVE 6.1: Maintain and update roadways to current standards.

Performance Measure		Benchmark
6.1.1	Percent of Interstate Pavement in	Maintain or improve
	Good Condition	Existing value is reported in the Congestion
		Management Process.
6.1.2	Percent of Interstate Pavement in	Maintain or reduce
	Poor Condition	Existing value is reported in the Congestion
		Management Process.
6.1.3	Percent of Non-Interstate	Maintain or improve
	Pavement in Good Condition	Existing value is reported in the Congestion
		Management Process.
6.1.4	Percent of Non-Interstate	Maintain or reduce
	Pavement in Poor Condition	Existing value is reported in the Congestion
		Management Process.

#### • OBJECTIVE 6.2: Maintain and update bridges to current standards

Performance Measure		Benchmark
6.2.1	Percent of National Highway	Maintain or improve
	System Bridges in Good	Existing value is reported in the Congestion
	Condition	Management Process.
6.2.2	Percent of National Highway	Maintain or reduce
	System Bridges in Poor Condition	Existing value is reported in the Congestion
		Management Process.
6.2.3	Percent of State Highway Bridges	Maintain or improve
	in Good Condition	Existing value is reported in the Congestion
		Management Process.
6.2.4	Percent of State Highway Bridges	Maintain or reduce
	in Poor Condition	

		Existing value is reported in the Congestion
		Management Process.
6.2.5	Percent of Non-State Highway	Maintain or improve
	Bridges in Good Condition	Existing value is reported in the Congestion
		Management Process.
6.2.6	Percent of Non-State Highway	Maintain or reduce
	Bridges in Poor Condition	Existing value is reported in the Congestion
		Management Process.

• OBJECTIVE 6.3: Maintain and update transit systems to current standards

Performance Measure		Benchmark
6.3.I	Average Age of Vehicles	Maintain or reduce
		Existing value is reported in the Congestion
		Management Process.
6.3.2	Average Rating of Facilities on	Maintain or improve
	TERM Scale	Fall below 3.0

#### GOAL 7: CREATE RELIABLE AND RESILIENT MULTIMODAL INFRASTRUCTURE

A reliable and resilient multimodal transportation infrastructure provides accessible and diverse transportation options that ensure mobility, system preservation, supports evacuation needs, and addresses social equity.

The objectives for reliable and resilient multimodal infrastructure are listed below.

• OBJECTIVE 7.1: Incorporate climate risk in project planning, system preservation and maintenance and determine appropriate measures to mitigate risk or repurpose threatened facilities.

Performance Measure		Benchmark
7.1.1	Consideration for vulnerable, at- risk facilities	Evaluation of projects/scenarios

• OBJECTIVE 7.2: Provide reliable mobility access and minimize impact of disruptions to regional mobility.

The performance of this objective is qualitative.

OBJECTIVE 7.3: Support regional evacuation needs as reflected in municipal Emergency Management Plans.

Performance Measure	Benchmark
---------------------	-----------

7.3.I	Number of projects on an	Evaluation of projects/scenarios
	evacuation route	

• OBJECTIVE 7.4: Address social equity in adaptation/resilience strategy implementation.

Performance Measure		Benchmark
7.4.1	Number of projects in low income	Evaluation of projects/scenarios
	census tracts	

#### **GOAL 8: ENHANCE TOURISM TRANSPORT MANAGEMENT**

Tourism Transport Management involves improving transportation options for recreational, event, and general tourism travel to enhance the overall transportation system while improving mobility and transportation options.

The objectives for tourism transport management are listed below.

• OBJECTIVE 8.1: Develop a Regional Tourism Transport Management Program.

Performar	nce Measure
8.1.1	Complete Regional Tourism Transport Management Plan

OBJECTIVE 8.2: Improve and provide diverse tourism transportation options.

Performance Measure		Benchmark
8.2.1	Number of projects in high	Evaluation of projects/scenarios
	tourism areas	

• OBJECTIVE 8.3: Encourage the integration of alternative transportation into tourist activities.

Performar	nce Measure	1
8.3.1	County comprehensive plans include alternative transportation for tourists	Ī

# GOAL 9: ENSURE NORTH FLORIDA IS READY FOR CONNECTED AND AUTONOMOUS VEHICLES AND INTERNET OF THINGS (IOT) TECHNOLOGIES THAT SUPPORT TRANSPORTATION

The North Florida Region will continue to embrace emerging technologies, including connected and automated vehicles, Internet of Things (IoT) components and advanced data management and analytics, preparing the transportation infrastructure in the region for these advances in transportation technology.

FDOT's Office of Policy Planning has recently developed "Guidance for Assessing Planning Impacts and Opportunities of Automated, Connected, Electric and Shared-Use (ACES) Vehicles" that outlines 33 elements that Transportation Planning Organizations (TPO's) in Florida should consider in their short, medium and long-range planning. These elements should be adopted by the TPO in future work efforts.

The objectives to ensure North Florida is ready for Connected and Autonomous Vehicles (CAV) and IoT technologies are listed below.

#### OBJECTIVE 9.1: Deploy a regional data exchange

Performance Measure		
9.1.1	Complete Phase 1 of the data exchange	
9.1.2	Develop a CV module for CV data storage and analytics	

#### OBJECTIVE 9.2: Prepare infrastructure for connected and automated vehicles

Performance Measure		Benchmark
9.2.1	Miles of vehicle to infrastructure (V2I) technology (DSRC, C-V2X, or 5G)	Increase miles of V2I technology
9.2.2	Miles of fiber optic cable	Increase miles of fiber optic cable

• OBJECTIVE 9.3: Implement cybersecurity measures and best practices throughout the system to protect user privacy and data and to ensure safe operations.

Performance Measure		
9.3.1	Complete Cybersecurity Plan	
9.3.2	Develop and Implement Strategy for Security Credential Management Plan (SCMS)	

• OBJECTIVE 9.4: Develop and implement policies that support connected and automated vehicles

Performa	Performance Measure	
9. <del>4</del> .1	Complete a Connected and Autonomous Vehicle Policy Plan	

• OBJECTIVE 9.5: Deploy strategies to support First Mile/Last Mile travel options.

Performai	Performance Measure	
9.5.1	Complete First Mile/Last Mile Plan	

• OBJECTIVE 9.6: Incorporate CAV into the North Florida Travel Demand Model.

Performance Measure	
9.6.1	CAV included in the North Florida Travel Demand Model

• OBJECTIVE 9.7: Implement scenario planning activities surrounding Connected, Automated, Electric and Shared vehicles to determine the impacts on network usage, funding and other performance measures.

Performance Measure		
9.7.1	Develop scenarios surrounding ACES	
9.7.2	Develop scenario planning methodology to determine impacts on the network	
	usage, funding, and other performance measures	

• OBJECTIVE 9.8: Consider Autonomous Vehicle only lanes or zones to support enhanced mobility opportunities resulting from automated vehicles.

Performance Measure		nce Measure
	9.8.1	Complete a study on autonomous vehicle only lanes or zones

## **APPENDIX IV**

**FY 2022 List of Priority Projects** 

2022 Annual List of Priority Projects

2022

Adopted March 10

Project priorities of the North Florida Transportation Planning Organization for inclusion in the new fifth year of the Florida Department of Transportation Work Program

#### Contents

OVERVIEW	3
PROJECT PHASING	
2045 LONG RANGE TRANSPORTATION PLAN	
Resilience and Vulnerability	
Regional System Safety Plan

TRANSPORTATION ALTERNATIVES PROGRAM (TAP) PROJECTS	15
TRANSPORTATION ALTERNATIVES PROGRAM (TAP) PROJECTS	16
SUNTRAILS PRIORITIES	17
TRANSPORTATION REGIONAL INCENTIVE PROGRAM (TRIP) PROJECT PRIORITIES	18

#### **OVERVIEW**

The North Florida Transportation Planning Organization (North Florida TPO) Transportation Improvement Program (TIP) for Fiscal Years 2023/2024 through 2027/2028 begins with preparing a "List of Priority Projects" to be used in developing the Florida Department of Transportation's (FDOT) Tentative Five Year Work Program. The "List of Priority Projects" identifies potential projects to be funded in the new fifth year (2027/2028) of the FDOT Work Program. However, by creating the Strategic Intermodal System (SIS) and the Transportation Regional Incentive Program (TRIP) in Florida, the "List of Priority Projects" now includes potential projects to be funded in other years of the FDOT Work Program under the SIS and TRIP programs. The "List of Priority Projects" includes a prioritized listing of state highway, mass transit, aviation, intermodal, and Transportation Alternative Program (TAP) and Transportation Regional Incentive Program (TRIP) projects\*.

The North Florida TPO expects all projects currently programmed in the FDOT Work Program to advance to the next development phase. This will ensure that implementing the 3-C planning process (continuing, cooperative, and comprehensive) in the North Florida TPO area is being implemented, as required by federal and state statutes. If FDOT cannot complete the programmed phase and advance the project to the next logical phase, it is incumbent that the agency provides an explanation to the North Florida TPO.

#### **PROJECT PHASING**

- Project Development and Environment (PD&E)
- Preliminary Engineering (PE)
- Right-of-Way (ROW)
- Construction (CST)

<sup>\*</sup> Intended adoption is at the March TPO Board Meeting, following review by the TAC and CAC.

#### 2045 LONG RANGE TRANSPORTATION PLAN

On November 14, 2019 the North Florida TPO adopted Path Forward 2045, a fiscally constrained Long Range Transportation Plan for Clay, Duval, Nassau and St. Johns Counties. Concurrent with this effort the following documents were prepared:

#### Resilience and Vulnerability

- The North TPO examined the vulnerability of major roads in the region. Vulnerability is ranked from low to high. The vulnerability rating of relevant facilities is indicated on the List of Region-Wide Priority Projects. Supporting documentation is available at: <a href="http://pathforward2045.com/wp-content/uploads/2019/08/Resiliency-Phase-II-Tech-Memo-1Finalv3.pdf">http://pathforward2045.com/wp-content/uploads/2019/08/Resiliency-Phase-II-Tech-Memo-1Finalv3.pdf</a>
- Region-wide priority projects identified as at risk in this report are identified by vulnerability category.
- Low Vulnerability
- Moderate-Low Vulnerability
- Moderate High Vulnerability
- High Vulnerability

#### Regional System Safety Plan

- This plan was updated. It identifies high crash corridors, high crash intersections and corridors with a high incidence of bicycle and pedestrian crashes. High crash corridors are identified on the List of Region-Wide Priority Projects. Supporting documentation is available at:
   <a href="https://northfloridatpo.com/uploads/Studies/FINAL\_RSSP\_NOV2019.pdf">https://northfloridatpo.com/uploads/Studies/FINAL\_RSSP\_NOV2019.pdf</a>
- Region-wide priority projects on HIGH CRASH CORRIDORS are identified as such.

#### Congestion Management Process

 The Congestion Management Process was updated. Supporting documentation is available at: <a href="https://northfloridatpo.com/uploads/Studies/performance/2019\_NFTP\_CMP.pdf">https://northfloridatpo.com/uploads/Studies/performance/2019\_NFTP\_CMP.pdf</a>

All documentation for the 2045 Long Range Transportation Plan is available at <a href="http://northfloridatpo.com/planning/lrtp">www.pathforward2045.com</a> and at <a href="http://northfloridatpo.com/planning/lrtp">http://northfloridatpo.com/planning/lrtp</a>

#### LIST OF PRIORITY PROJECTS PROCESS

#### **Develop List of Candidate Projects (January)**

- 1. A list of candidate projects is developed from the following:
  - Projects in the previous year List of Priority Projects not funded through construction.
  - Local County/City submittals within the North Florida TPO area
  - Local Airport and Transit Authority submittals within the North Florida TPO area
  - Concurrency Management Process
  - Public Input
- 2. Project Ranking (February)
  - Unless otherwise indicated, projects were initially prioritized in Path Forward 2045, the North Florida TPO's Long Range Transportation Plan adopted November 14, 2019
  - TPO Staff works with local governments to develop a preliminary List of Priority Projects to submit to the Technical Advisory Committee (TAC), Citizens Advisory Committee (CAC) and Transportation Planning Organization (TPO) Board for review and approval at the March TAC, CAC and TPO Board Meetings.
  - Mass transit and aviation projects are prioritized by the submitting agencies and are forwarded to the North Florida TPO to include in the LOPP Document.
  - Adopting the List of Priority Projects (March)
  - Following approval by the North Florida TPO, the List of Priority Projects is submitted to FDOT for use in developing the Five-Year Tentative Work Program.

#### **REGION-WIDE PRIORITY PROJECTS**

	REGION-WIDE PRIORITY PROJECTS				
Rank	Project	Limits	Description	Status	
		ED IN THE CURRENT 5-Y			
	CR 220 Clay County	Henley Rd to Knight Boxx Rd	Widen to 4-lanes	Construction FY 2024	
	First Coast Expressway Clay and St. Johns Counties	Blanding Blvd to N of SR 16	New construction	Completion FY 2025	
		N of SR 16 to E of CR 2209	New construction	Completion FY 2024	
		E of CR 2209 to CR16A spur (includes bridge)	New construction	Construction FY 2022	
		CR 16A spur to I-95	New construction	Construction FY 2023

<sup>\*</sup> Vulnerability evaluated in the Resiliency & Vulnerability Study
High Crash Corridors and Intersections identified in the Regional System Safety Plan

#### AVIATION PRIORITY PROJECTS—JACKSONVILLE AVIATION AUTHORITY

Rank	Project
1	JAX-Concourse B Replacement - \$233,000,000  The Jacksonville International Airport (JAX) Concourse B Replacement includes design and construction of a six-gate concourse, associated ramp area, and the relocation of Taxiway V. The concourse will consist of up to three levels with approximately 165,000 total square feet and includes the development of holdrooms, aircraft gates, concession space, restrooms, and a connecting corridor with moving sidewalks.
2	JAX-Cargo Apron Expansion - \$2,500,000  This project will expand the existing Air Cargo apron by adding 7000 square yards of concrete apron to the southern side of the existing apron. The existing air cargo apron is located north of runway 14/32 and south of the terminal structure. This project is necessary to accommodate increased air cargo operations and larger cargo aircraft.
3	JAX-Wetland Mitigation - \$13,500,000 This project will be the removal and mitigation of jurisdictional wetlands deemed Hazardous Wildlife Habitat for JIA. The proposed area is 166.59 acres in size and lies within the AOA, directly northeast of RWY 8/26.
4	Cecil-Approach Road Utilities & Roadway - \$20,000,000  The Approach Road Utilities & Roadway project supports the construction of a two-lane road and associated common use utilities within the boundary of Cecil Airport and Cecil Spaceport. The ultimate construction of the road will serve as the common use roadway link connecting the common use Spaceport Operations Area to other aerospace development and public use areas.
5	Cecil-Runway 18R/36L Rehabilitation - \$8,500,000  This project will rehabilitate the portions of the asphalt on RWY 18R/36L. This project will include the design and construction of the Runway 18L/36R asphalt keel reconstruction. The project abuts the concrete section of Runway 18L and is 500' in length by 50' in width. The existing pavement consists of 4.5" of asphalt pavement over 9" of lime rock base. The anticipated new pavement section consists of 12" of compacted subgrade, 8" of lime rock base, and 9" of asphalt pavement.
6	Spaceport-Payload Prep Facility - \$2,000,000 Payload processing is an integral part of Commercial Space Operations. Currently, a Payload preparation facility is not available at Cecil Spaceport and processing is completed through the modification of existing facilities to meet the needs of individual launch providers and specific payloads.
7	Spaceport-Rocket Motor Test Facility - \$1,000,000  The design and construction of the Rocket Motor & Vehicle Testing Facility will include the development of a concrete pad accompanied by a control room and propellant and oxidizer storage facility dimensioned according to a baseline rocket engine group determined by the Facility Requirements Evaluation. Required utilities will include electric, fiber and plumbed to eventually connect water for fire suppression. The facility will be designed taking into consideration propellant combinations, thrust levels and engine types as well as setback distances to comply with FAA Explosive Siting Criteria.

## MASS TRANSIT PRIORITIES—JACKSONVILLE TRANSPORTATON AUTHORITY

Rank	Project	Description	Justification
1	Vehicle Acquisition	Annual SU funding with \$2.5 toll credit matching	Replace new buses/rolling stock with CNG and EV buses plus related equipment
2	Para-Transit (CTC)	Purchase para-transit equipment	Required for ADA compliance
3	U <sup>2</sup> C Agile Program	Various U <sup>2</sup> C routes throughout the Jacksonville area	Autonomous transit routes at various locations around Jacksonville
4	U <sup>2</sup> C Extension 4	The third phase of the U <sup>2</sup> C program	The fourth at-grade extension of the U <sup>2</sup> C program
5	Ferry	Additional Ferry Boat	An additional boat is needed to increase capacity at the Mayport Ferry crossing
6	Commuter Rail Project Development	Promote transit-oriented development, station area planning, and funding for Commuter Rail service on the Southeast Corridor	Project Development and Engineering (PD&E) is funded through the LOGT, but there is no funding included for design
7	ITS/Corridor Development/Service Enhancement	Develop/implement a regional plan focused on transit and implement communications based elements	Capacity constraints on major corridors suggest implementation of ITS to enhance mobility
8	JRTC Amtrak Station Relocation	Relocate Amtrak station from Clifford Lane to Prime Osborn Convention Center site	Immediate opportunity to restore intercity passenger service to Downtown Jacksonville
9	Regional Passenger and Operations Enhancements	Plan, design, and construct new passenger and operations facilities	Provide new facilities to enhance passenger experience and increase efficiency of operations
10	MyJTA Mobility Application	Mobile application that will enable multi- modal trip planning and ticketing, real time arrival/departure information, vehicle crowding information, and customer notifications of detours and trip interruptions.	Provides a single Mobility as a Service mobile application to meet both Fixed Route and On- Demand regional transportation needs for Northeast Florida's residents.

#### MASS TRANSIT PRIORITIES—ST. JOHNS COUNTY/SUNSHINE BUS

Rank	Project	Description	Justification
1	Operating Assistance 5307	Funding for operations and administration	Expand transit system to support additional revenue miles and passengers
2	Preventative Maintenance Capitalized Operating Expense	Funding for preventative maintenance on revenue vehicles	Keep vehicles in service and facilitate continued operations
3	Operating Assistance CTD/Trip Equipment Grant	Continuing Bus Operations	Match for FTA 5307 and support for current and expanded service
4	Operating Assistance Block Grant Funds	Continuing Bus Operations	Support current service and expand service
5	Operating and Capital Assistance FTA 5310	Continuing Bus Operations	Support current service and expand service
6	Operating and Capital Assistance FTA 5311	Continuing Bus Operations	Support current service and expand service
7	Capital Assistance STP Flex	Vehicle Acquisition	Vehicles for route expansion, and paratransit vehicle replacements
8	Rolling Stock	Vehicle Acquisition	Paratransit vehicle replacement
9	System Planning	Plan updates	Update plans as a prerequisite to receiving state and federal funds
10	Shelter Installation	Bus shelters	System improvements, permanent shelters
11	Security Maintenance	Maintain existing security equipment	Maintain and replace existing security equipment at Transit Facility and on Buses
12	Equipment	Shop equipment	Required to meet maintenance schedules
13	Facility Maintenance	Repair/Replace Facility & Equipment	Maintain transit facility and grounds

These projects have been selected from the agency Transit Development Plan and prioritized by St. Johns County Commission//Sunshine Bus.

#### PORT PRIORITIES—JAXPORT

#### **Project**

Harbor Deepening

Blount Island Marine Terminal (BIMT) Berth Extensions for Roll On Roll Off (RO/RO)

Blount Island Marine Terminal (BIMT) redevelopment for Auto processing expansion

Dredge Material Management Area (DMMA) expansion/capacity creation

Berth reconstruction at upgrades at BIMT and Talleyrand Marine Terminal (TMT)

ITS improvements for cargo movements at JAXPORT terminals

Terminal expansion near TMT, BIMT and Dame Point Marine Terminal (DPMT)

RO/RO expansion at DPMT

#### PORT PRIORITIES—PORT OF FERNANDINA

#### **Project**

Harbor Deepening and Navigation Study – of the federal access channel to the Port of Fernandina. Requested by the USACE in its 2022 budget request.

M-95 Marine Highway Study – analysis of the need and requirements of a container barge service connecting ports in the Southeast and Mid-Atlantic coastal range to remove trucks from local roads and highways within the NFTPO region. The Port of Fernandina has been designated an American Marine Highway Port by the USDOT / Maritime Administration (MARAD) and is actively seeking to institute a regular coast-wise container barge service as a green alternative to trucks on Interstate 95. Cooperation and support of other regional ports is required.

Study of Potential Ingress/Egress Improvements at the Port of Fernandina – an analysis of necessary improvements to enhance fluidity of truck movements in and out of the Port and decrease impact on local streets.

Traffic Study and Truck Survey – update current studies of the capacity of State Road 200 to support additional growth of the Port.

Design & Construction of Office Space at the Port for the US Customs & Border Patrol and the Port Authority – required by federal statute. Needs to be completed and online by end of 2023.

Land Acquisition & Construction of Additional Warehouse Space Adjacent and Contiguous to the Port - necessary to accommodate the growth of the Port's existing break-bulk business.

Design & Construction of a Tide Management and Flood Control System – necessary to prevent loss of existing terminal acreage that currently floods during high tides.

Rail Freight Mobility Study – Analysis of existing rail infrastructure from the Port of Fernandina to the CSX interchange in Yulee and to the CSX main yard in Jacksonville to increase capacity.

#### TRANSPORTATION ALTERNATIVES PROGRAM (TAP) PROJECTS

The following table includes multi-use Trail and School Safety Walks projects submitted for funding in FY 2025/2026.

MULTI-USE TRAILS						
Rank	Project Name	Limits	<b>Estimated Cost</b>	Status		
CONSTRUCTION FUNDED						
	Amelia Island Parkway Multi-Use Trail, Phase 2, Nassau County	Bailey Road to 14th St	\$876,107	Construction FY 23/24		
		SR A1A/8 <sup>th</sup> Street to Bailey Road	\$166,500 PE	PE FY 19/20		
		SR A1A/Fletcher Avenue to Via del Rey	\$756,196	FY 22/23		
		Via del Rey to 14th St	\$1,167,327	FY 23/24		
	Black Creek Trail Extension	US17 from Ball Rd to	\$3.2 M	PE FY 22/23		
	across US 17 Bridge (446154)  Clay County	Black Creek Trail		Construction FY 25/26		
	U	NFUNDED PRIORITIES				
1	14th Street Trail Nassau County	Dee Dee Boat Ramp to Sadler Rd, down Sadler Rd to Will Hardee and down Will Hardee extending to the Simmons Rd Trail	\$8.5 M			
2	East Coast Greenway/Core to Coast Trail Duval County	SR A1A and Wonderwood Drive to Fort Caroline National Monument	Estimate needed			
3	Vilano Trail (447736) St. Johns County	San Marco Avenue to Duval County Line	\$61.2M	PD&E FY 22/23 \$600k PE FY 23/24 \$600k (San Marco to N. of Park Entrance)		

### TRANSPORTATION ALTERNATIVES PROGRAM (TAP) PROJECTS

\ /						
SCHOOL SAFETY SIDEWALKS						
Rank	Project Name	Limits	Cost Estimate			
	CONSTRUC	TION FUNDED				
	Yulee Elementary School Nassau County	Sidewalks on Felmor Road to provide access to Yulee Elementary School.	PE FY 24/25 \$113k (Safe Streets to School) CST FY 26/27 \$622k (Safe Streets to School)			
	UNFUNDE	D PRIORITIES				
1	Valley Ridge Academy St. Johns County	Palm Valley Road from Walden Chase neighborhood to Valley Ridge Drive	Estimate needed			
2	San Jose Elementary School Duval County	Construct new sidewalk to fill gaps	Estimate needed			
3	<b>Doctor's Inlet Elementary</b> Clay County	Old Jennings Rd from College Dr. to Knight Boxx Rd.	Estimate Needed			

#### **SUNTRAILS PRIORITIES**

SunTrails is a competitive program. Projects compete statewide, must be on the SunTrails map, must have a detailed study with segment by segment cost estimates. Applications will be submitted when projects meet these criteria. <a href="https://www.floridasuntrail.com">www.floridasuntrail.com</a>

Project Name	Project Description/Project Limits	Estimated Cost
St. Johns River to Sea Loop	West of I-95 to City of St. Augustine to Flagler County Line	This project is specifically reference in State legislation and does not compete for funding with the projects listed below.
Timucuan Trail  Duval County	Fort George River to Hanna Park	Study/Estimate needed
North Nassau Trail Nassau County	Amelia Island Trail North to Georgia State Line via US 17	Study/Estimate Needed
Vilano Trail St. Johns County	San Marco Avenue to Duval County Line	Estimates are available for each segment of this trail
Northeast Florida Greenway Trails Clay County	Duval County Line at Veterans Park to Jennings Forest Trail Head at Live Oak Lane	Study/Estimate Needed

# TRANSPORTATION REGIONAL INCENTIVE PROGRAM (TRIP) PROJECT PRIORITIES

The Transportation Regional Incentive Program (TRIP) is funded with Documentary Stamp funds. The North Florida TPO is the TRIP Agency for Baker, Clay, Duval, Nassau and St. Johns Counties. This list is approved by the TRIP Agency, which includes the North Florida TPO Board and one member of the Baker and Putnam County Commissions. TRIP eligible projects include all funded projects included in the Region-Wide Priority list on pages 6 and 7 in addition to the projects listed below. These projects are not ranked.

TRANSPORTATION REGIONAL INCENTIVE PROGRAM (TRIP) PROJECT				
		PRIORITIES		
County	Project	Limits	Description	
Baker	Midpoint Parkway/Truck By- Pass, Phase 1		Construct new 2-lane road	
Putnam	US 17	Volusia County Line to Pomona Park/Feagle Avenue	Widen to 4-lanes	
St. Johns County	SR 312 Extension	SR 207 to US 1	New road construction	
Duval County	SR 228 Normandy Blvd	Equestrian Center to US 301	Widen to 4-lanes with bike lanes and sidewalks *Moderate Vulnerability	
Clay County	CR 220	SR 21 to Henley Rd	Widen to 4-lanes High Crash Intersection (CR220 & Henley Rd)	
Nassau County	SR 200/SR A1A	I-95 to Amelia Island Pkwy	Intersection improvements High Crash Corridor *Moderate-High Vulnerability	
Duval County	SR 212 Beach Boulevard	Parental Home Rd to I-295	Bicycle, pedestrian and intersection improvements High Crash Corridor *Moderate-Low Vulnerability	
St. Johns County	CR 2209	SR 9B to SR 16	9B to Silverleaf Pkwy Widen to 6-lanes /Intersection Improvements; Silverleaf Pkwy to SR 16 Design 6 lane and Construct 4 lane	
Clay County	SR 16	Green Cove Springs City Limits to First Coast Expressway Interchange	Widen to 4-lanes *Low Vulnerability	

Nassau County	US 17	Duval County Line to SR 200	Widen to 4- lanes/Intersection improvements
Duval/Nassau	SR 115 Lem Turner Rd	I-295 to US 301	Widen to 4-lanes with multi- use trail/Intersection Improvements *Moderate Low Vulnerability
St. Johns County	Race Track Rd	Bartram Park Blvd to US 1	Widen to 4- lanes/Intersection improvements
Clay County	Cheswick Oaks Ave	Challenger Drive to end of 2- lane developer funded section	New 2-lane road
Duval County	SR 104 Dunn Ave	New Kings Road to I-295	Widen/intersection improvements *Low Vulnerability
Duval County	US 1	At Racetrack Rd	Intersection Improvements
St. Johns County	SR A1A	Mickler Road to Marsh Landing Pkwy	Widen to 4- lanes/Intersection Improvements
Duval County	I-295	At SR 13	Interchange improvements
St. Johns County	SR 16	International Golf Pkwy to Outlet Mall Entrance	Widen to 4 lanes
Duval County	Atlantic Blvd/Third Street (SR A1A)	Mayport Rd to St. Johns County Line	Context Sensitive Improvements: Bicycle, Pedestrian and intersection upgrades High Crash Corridor *Moderate-High Vulnerability
Clay/Duval	SR 21 Blanding Blvd	CR 220 to Collins Road	Intersection improvements  High Crash Corridor  *Low Vulnerability
Clay County	CR 315	Medinah Ln to First Coast Connector	Widen to 4 lanes
Duval County	Southside Blvd	Old Baymeadows Rd to Baymeadows Rd	Intersection Redesign

## 1 - PURPOSE

This document is based on a template provided by the Florida Department of Transportation to Florida's metropolitan planning organizations (MPO) with language that Florida's MPOs may incorporate in Transportation Improvement Programs (TIP) to meet the federal transportation performance management rules.

The document is consistent with the Transportation Performance Measures (TPM) Consensus Planning Document developed jointly by the Florida Department of Transportation (FDOT) and the Metropolitan Planning Organization Advisory Council (MPOAC). The Consensus Planning Document outlines the minimum roles of FDOT, the MPOs, and the public transportation providers in the MPO planning areas to ensure consistency to the maximum extent practicable in satisfying the federal transportation performance management requirements.

The document is organized as follows:

- Section 2 provides a brief background on transportation performance management;
- Section 3 covers the Highway Safety measures (PM1);
- Section 4 covers the Bridge and Pavement Condition measures (PM2);
- Section 5 covers System Performance and Freight Movement measures (PM3);
- Section 6 covers Transit Asset Management (TAM) measures; and
- Section 7 covers Transit Safety measures.

## 2 - BACKGROUND

Transportation Performance Management (TPM) is a strategic approach to connect transportation investment and policy decisions to help achieve performance goals. Performance measures are quantitative expressions used to evaluate progress toward goals. Performance targets are quantifiable levels of performance to be achieved within a time period. Federal transportation law requires state departments of transportation (DOT), MPOs, and public transportation providers to conduct performance-based planning by tracking performance and establishing data-driven targets to assess progress toward achieving goals. Performance-based planning supports the efficient investment of transportation funds by increasing accountability, providing transparency, and linking investment decisions to key outcomes related to seven national goals established by Congress:

- Improving safety;
- Maintaining infrastructure condition;
- Reducing traffic congestion;
- Improving the efficiency of the system and freight movement;
- Protecting the environment; and
- Reducing delays in project delivery.

Federal law requires FDOT, the MPOs, and public transportation providers to coordinate when selecting performance targets. FDOT and the MPOAC developed the TPM Consensus Planning Document to describe the processes through which these agencies will cooperatively develop and share information related to transportation performance management and target setting.

# 3 - HIGHWAY SAFETY MEASURES (PM1)

The first of FHWA's performance management rules establishes measures to assess fatalities and serious injuries on all public roads. The rule requires state DOTs and MPOs to annually establish targets and report performance and progress toward targets to FHWA for the following safety-related performance measures:

- 1. Number of Fatalities;
- 2. Rate of Fatalities per 100 million Vehicle Miles Traveled (VMT);
- 3. Number of Serious Injuries;
- 4. Rate of Serious Injuries per 100 million VMT; and
- 5. Number of Nonmotorized Fatalities and Serious Injuries.

#### 3.1 Highway Safety Targets

#### 3.1.1 Statewide Targets

Safety performance measure targets are required to be adopted on an annual basis. In August of each calendar year, FDOT reports targets to FHWA for the following calendar year. On August 31, 2022, FDOT established statewide safety performance targets for calendar year 2023. Table 3.1 presents FDOT's statewide targets.

Table 3.1. Statewide Highway Safety Performance Targets

Performance Measure	Calendar Year 2023 Statewide Target
Number of fatalities	0
Rate of fatalities per 100 million vehicle miles traveled (VMT)	0
Number of serious injuries	0
Rate of serious injures per 100 million vehicle miles traveled (VMT)	0
Number of non-motorized fatalities and serious injuries	0

FDOT adopted a vision of zero traffic-related fatalities in 2012. This, in effect, became FDOT's target for zero traffic fatalities and quantified the policy set by Florida's Legislature more than 35 years ago (Section 334.046(2), Florida Statutes, emphasis added):

<sup>&</sup>quot;The mission of the Department of Transportation shall be to provide a safe statewide transportation system..."

FDOT and Florida's traffic safety partners are committed to eliminating fatalities and serious injuries. As stated in the Safe System approach promoted by the FHWA, the death or serious injury of any person is unacceptable. The Florida Transportation Plan (FTP), the state's long-range transportation plan, identifies eliminating transportation-related fatalities and serious injuries as the state's highest transportation priority. Therefore, FDOT established 0 as the only acceptable target for all five federal safety performance measures.

#### 3.1.2 MPO Safety Targets

MPOs are required to establish safety targets annually within 180 days of when FDOT established targets. MPOs establish targets by either agreeing to program projects that will support the statewide targets or establish their own quantitative targets for the MPO planning area.

The North Florida TPO, along with FDOT and other traffic safety partners, shares a high concern about the unacceptable number of traffic fatalities, both statewide and nationally. As such, on December 8, 2022, the North Florida TPO agreed to support FDOT's statewide safety performance targets for calendar year 2023, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets. The safety initiatives within this TIP are intended to contribute toward achieving these targets.

#### 3.2 Safety Trends in the MPO Area

After FDOT set its Safety Performance Measures targets in 2018, both FDOT and the North Florida TPO established 2017 Baseline Safety Performance Measures. To evaluate baseline Safety Performance Measures, the most recent five-year rolling average (2013-2017) of crash data and VMT were utilized. Table 3-2 presents the Baseline Safety Performance Measures for Florida and the North Florida TPO.

**Table 3-2 Baseline Safety Performance Measures** 

Performance Measure	Florida	North Florida TPO
Number of Fatalities	2,685.6	212.0
Number of Serious Injuries	20,830.0	1328.8
Fatality Rate per 100 Million VMT	1.3	1.3
Serious Injury Rate per 100 Million VMT	10.2	8.2
Total Number of non-Motorized Fatalities and non-Motorized serious injuries	3,253.0	190.8

Source: FDOT 2017 FHWA Performance Measures per MPO

The TIP development process, consistent with the process used to develop the TPO's Long-Range Transportation Plan, includes analysis of safety data trends, including the location and factors associated with crashes with emphasis on fatalities and serious injuries. These data are used to help identify regional safety issues and potential safety strategies for the LRTP and TIP.

In the North Florida TPO's **2022 Annual Mobility Repor**t the North Florida TPO reported the past five years of safety-related performance measures. Table 3-3 summarizes the safety-related performance measure data over the past five years.

Table 3-3 Five Year Safety Performance Data for the North Florida TPO Region

Performance Measure	2016	2017	2018	2019	2020	2021	Target
Number of Fatalities	234	232	215	232	266	271	0
Rate of Fatalities per 100 Million VMT	1.378	1.347	1.234	1.301	1.614	1.547	0
Number of Serious Injuries	1,195	1,191	863	869	820	923	0
Rate of Serious Injuries per 100 Million VMT	7.037	6.913	4.977	4.874	4.976	5.368	0
Number of Non- motorized Fatalities and Serious Injuries	189	192	174	173	179	192	0

The data shows that over the past five years fatalities and fatality rates have increased while serious injuries and serious injury rates have increased. Non-motorized fatalities and serious injuries have shown a slight increase during this time-span. The TPO uses crash data tracking fatalities and serious injuries to analyze past trends and identify regional safety issues. Tracking these measures will help to estimate the effectiveness of future TPO transportation investment, as reflected in the TIP.

Looking at individual years shows the volatility of safety data as values can vary greatly between years. Table 3-4 shows the changes in Safety Performance Measures for the North Florida TPO from 2016 through 2021 using a 5-year rolling average. This rolling average smooths the data to provide a better trend analysis.

Table 3-4 Five-Year Rolling Average of Safety Performance Data for the North Florida TPO Region

Performance Measure	2012- 2016	2013- 2017	2014- 2018	2015- 2019	2016- 2020	2017- 2021	Target
Number of Fatalities	201.4	212.6	218.6	226.2	235.8	242.2	0
Rate of Fatalities per 100 Million VMT	1.272	1.305	1.309	1.321	1.377	1.411	0
Number of Serious Injuries	1,371	1,328	1,204	1,103	991.2	936.8	0
Rate of Serious Injuries per 100 Million VMT	8.730	8.225	7.256	6.478	5.780	5.446	0
Number of Non- motorized Fatalities and Serious Injuries	199.0	194.0	186.6	180.6	177.0	180.2	0

From the five year averages it becomes clear that fatalities and serious injuries as well as fatlity rates and serious injury rates have consistently decreased. Non-motorized fatalities and serious injuries have decreased consistently until the 2017-2021 average where it showed a slight uptick.

Concurrent with the update of Path Forward 2045, the TPO's Long Range Transportation Plan, the TPO updated the Regional Congestion Management Process and Regional System Safety Plan incorporating the Federal performance measures and state and performance local targets in both. Historically, the TPO has reported progress in achieving these and other adopted measures in the Annual Mobility Report. The report is available on the TPO website and on-line tool is available as well.

## 3.3 FDOT Safety Planning and Programming

#### 3.3.1 Florida's Strategic Highway Safety Plan

Florida's Strategic Highway Safety Plan (SHSP), published in March 2021, identifies strategies to achieve zero traffic deaths and serious injuries. The SHSP was updated in coordination with Florida's 27 MPOs and the MPOAC, as well as other statewide traffic safety partners. The SHSP development process included review of safety-related goals, objectives, and strategies in MPO plans. The SHSP guides FDOT, MPOs, and other safety partners in addressing safety and defines a framework for implementation activities to be carried out throughout the state.

Florida's transportation safety partners have focused on reducing fatalities and serious injuries through the 4Es of engineering, education, enforcement, and emergency response. To achieve zero, FDOT and other safety partners will expand beyond addressing specific hazards and influencing individual behavior to reshaping transportation systems and communities to create a safer environment for all travel. The updated SHSP calls on Florida to think more broadly and inclusively by addressing four additional topics, which are referred to as the 4Is: information intelligence, innovation, insight into communities, and investments and policies. The SHSP also embraces an integrated "Safe System" approach that involves designing and managing road infrastructure to keep the risk of a mistake low and to ensure that when a mistake leads to a crash, the impact on the human body does not result in a fatality or serious injury. The five Safe System elements together create a holistic approach with layers of protection: safe road users, safe vehicles, safe speeds, safe roads, and post-crash care.

The SHSP also expands the list of emphasis areas for Florida's safety programs to include six evolving emphasis areas, which are high-risk or high-impact crashes that are a subset of an existing emphasis area or emerging risks and new innovations, where safety implications are unknown. These evolving emphasis areas include work zones, drowsy and ill driving, rail grade crossings, roadway transit, micromobility, and connected and automated vehicles.

#### 3.3.2 Florida's Highway Safety Improvement Program

While the FTP and the SHSP both highlight the statewide commitment to a vision of zero deaths, the Florida Highway Safety Improvement Program (HSIP) Annual Report documents statewide performance and progress toward that vision. It also lists all HSIP projects that were obligated during the reporting year and the relationship of each project to the SHSP.

As discussed above, in the 2022 HSIP Annual Report, FDOT reported 2023 statewide safety performance targets at "0" for each safety performance measure to reflect the vision of zero deaths. Annually, FHWA determines whether Florida has met the targets or performed better than baseline for at least four of the five measures. If this does not occur FDOT must submit an annual implementation plan with actions, it will take to meet targets in the future.

On April 21, 2022, FHWA reported the results of its 2020 safety target assessment. FHWA concluded that Florida had not met or made significant progress toward its 2020 safety targets, noting that zero had not been achieved for any measure and that only three out of five measures (number of serious injuries, serious injury rate, and number of non-motorized fatalities and serious injuries) were better than baseline. Subsequently, FDOT developed an HSIP Implementation Plan to highlight additional strategies it will undertake in support

of the safety targets. This plan was submitted with the HSIP Annual Report to FWHA on August 31, 2022 and is available at <a href="https://www.fdot.gov/Safety/safetyengineering/reports-and-plans">https://www.fdot.gov/Safety/safetyengineering/reports-and-plans</a>.

Consistent with FHWA requirements, the HSIP Implementation Plan focuses specifically on implementation of the HSIP as a core federal-aid highway program and documents the continued enhancements planned for Florida's HSIP to better leverage the benefits of this program. However, recognizing that FDOT already allocates all HSIP funding to safety programs - and building on the integrated approach that underscores FDOT's safety programs - the HSIP Implementation Plan also documents how additional FDOT, and partner activities may contribute to progress toward zero. Building on the foundation of prior HSIP Implementation Plans, the 2022 HSIP Implementation Plan identifies the following key commitments:

- Improve partner coordination and align safety activities.
- Maximize HSIP infrastructure investments.
- Enhance safety data systems and analysis.
- Focus on safety marketing and education on target audiences.
- Capitalize on new and existing funding opportunities.

Florida conducts extensive safety data analysis to understand the state's traffic safety challenges and identify and implement successful safety solutions. Florida's transportation system is evaluated using location-specific analyses that evaluate locations where the number of crashes or crash rates are the highest and where fatalities and serious injuries are most prominent. These analyses are paired with additional systemic analyses to identify characteristics that contribute to certain crash types and prioritize countermeasures that can be deployed across the system as a whole. As countermeasures are implemented, Florida also employs predictive analyses to evaluate the performance of roadways (i.e., evaluating results of implemented crash modification factors against projected crash reduction factors).

FDOT's State Safety Office works closely with FDOT Districts and regional and local traffic safety partners to develop the annual HSIP updates. Historic, risk-based, and predictive safety analyses are conducted to identify appropriate proven countermeasures to reduce fatalities and serious injuries associated with Florida's SHSP emphasis areas, resulting in a list of projects that reflect the greatest needs and are anticipated to achieve the highest benefit. While these projects and the associated policies and standards may take years to be implemented, they are built on proven countermeasures for improving safety and addressing serious crash risks or safety problems identified through a data-driven process. Florida continues to allocate all available HSIP funding to safety projects. FDOT's HSIP Guidelines provide detailed information on this data-driven process and funding eligibility.

Florida received an allocation of approximately \$189 million in HSIP funds for use during the 2021 state fiscal year from July 1, 2021 through June 30, 2022, and fully allocated those funds to safety projects. FDOT used these HSIP funds to complete projects that address intersections, lane departure, pedestrian and bicyclist safety, and other programs representing the remaining SHSP emphasis areas. This year's HSIP allocated \$159.7 million in infrastructure investments on state-maintained roadways and \$22.1 million in infrastructure investments on local roadways. The remaining \$7.2 million included supporting activities such as transportation safety planning, preliminary engineering, traffic engineering studies, transportation statistics, and public information or education. A list of HSIP projects can be found in the HSIP 2021 Annual Report.

Beginning in fiscal year 2024, HSIP funding will be distributed among FDOT Districts based on statutory formula to allow the Districts to have more clearly defined funding levels for which they can better plan to select and fund projects. MPOs and local agencies coordinate with FDOT Districts to identify and implement effective highway safety improvement projects on non-state roadways.

#### 3.3.3 Additional FDOT Safety Planning Activities

In addition to HSIP, safety is considered as a factor in FDOT planning and priority setting for projects in preservation and capacity programs. Data is analyzed for each potential project, using traffic safety data and traffic demand modeling, among other data. The <u>Florida PD&E Manual</u> requires the consideration of safety when preparing a proposed project's purpose and need as part of the analysis of alternatives. Florida design and construction standards include safety criteria and countermeasures, which are incorporated in every construction project. FDOT also recognizes the importance of the American Association of State Highway Transportation Official (AASHTO) Highway Safety Manual (HSM). Through dedicated and consistent training and messaging over the last several years, the HSM is now an integral part of project development and design.

FDOT holds Program Planning Workshops annually to determine the level of funding to be allocated over the next 5 to 10 years to preserve and provide for a safe transportation system. Certain funding types are further analyzed and prioritized by FDOT Central Offices, after projects are prioritized collaboratively by the MPOs, local governments, and FDOT Districts; for example, the Safety Office is responsible for the HSIP and Highway Safety Program (HSP) and the Systems Implementation Office is responsible for the Strategic Intermodal System (SIS). Both the Safety and SIS programs consider the reduction of traffic fatalities and serious injuries in their criteria for ranking projects.

## 3.4 Safety Investments in the TIP

The TIP includes projects that fall into specific investment priorities established by the MPO in the LRTP. This includes safety programs such as roadway lighting, traffic signals, bike lanes, sidewalks, intersection improvements and technology safety projects.

Safety is a priority for the North Florida TPO. In 2019 the TPO updated the Regional System Safety Plan, identifying high crash corridors and intersections and high pedestrian and bicycle crash corridors and intersections. An update to the Safety Plan is being performed in 2023 and will become an aid for prioritizing safety projects in the TIP

The TPO's commitment to safety is reflected in Path Forward 2045, the Long Range Transportation Plan in the Annual List of Priority Project's and in the Unified Planning Work Program. District 2 identifies high crash corridors and intersections in the List of Priority Projects for special consideration in project programming. In the Unified Planning Work Program (UPWP), the TPO studies corridors of concern to local governments who in turn request safety recommended safety enhancements. The TPO further demonstrates its commitment by contributing CM and SU funding to these projects when necessary.

The TIP FY 2024 to 2028 includes numerous projects that improve safety conditions. It is difficult to quantify the complete impact of safety related projects as nearly all projects include a safety element. The MPO continues monitoring investments in the TIP and demonstrating progress toward goals and objectives. These projects explicitly focused on safety fall in the following categories:

- 1. Bike lane/Sidewalk
- 2. Lighting
- 3. Traffic control devices/system
- 4. Safety projects
- 5. Signing and pavement markings
- 6. Intersection Improvements

A summary of safety projects by county are listed below:

## **Clay County**

Because safety is inherent in so many FDOT and North Florida TPO programs and projects, and because of the broad and holistic approach FDOT is undertaking with its commitment to Vision Zero, the program of projects in this TIP is anticipated to support progress towards achieving the safety targets.

# 4 – PAVEMENT & BRIDGE CONDITION MEASURES (PM2)

FHWA's Bridge & Pavement Condition Performance Measures Final Rule, which is also referred to as the PM2 rule, requires state DOTs and MPOs to establish targets for the following six performance measures:

- 1. Percent of NHS bridges (by deck area) classified as in good condition;
- 2. Percent of NHS bridges (by deck area) classified as in poor condition;
- 3. Percent of Interstate pavements in good condition;
- 4. Percent of Interstate pavements in poor condition;
- 5. Percent of non-Interstate National Highway System (NHS) pavements in good condition; and
- 6. Percent of non-Interstate NHS pavements in poor condition;

For the pavement measures, five pavement metrics are used to assess condition:

- International Roughness Index (IRI) an indicator of roughness; applicable to asphalt, jointed concrete, and continuous concrete pavements;
- Cracking percent percentage of pavement surface exhibiting cracking; applicable to asphalt, jointed concrete, and continuous concrete pavements;
- Rutting extent of surface depressions; applicable to asphalt pavements only;
- Faulting vertical misalignment of pavement joints; applicable to jointed concrete pavements only; and
- Present Serviceability Rating (PSR) a quality rating applicable only to NHS roads with posted speed limits of less than 40 miles per hour (e.g., toll plazas, border crossings). States may choose to collect and report PSR for applicable segments as an alternative to the other four metrics.

#### 4.1 Bridge & Pavement Condition Targets

#### 4.1.1 Statewide Targets

Federal rules require state DOTs to establish two-year and four-year targets for the bridge and pavement condition measures. On December 16, 2022, FDOT established statewide bridge and pavement targets for the second performance period ending in 2025. These targets are identical to those set for 2019 and 2021, respectively. Florida's performance through 2021 exceeds the targets. The two-year targets represent bridge and pavement condition at the end of calendar year 2023, while the four-year targets represent condition at the end of 2025. Table 4.1 presents the statewide targets.

Table 4.1. Statewide Pavement and Bridge Condition Performance Targets

Performance Measure	2023 Statewide Target	2025 Statewide Target
Percent of NHS bridges (by deck area) in good condition	50.0%	50.0%
Percent of NHS bridges (by deck area) in poor condition	10.0%	10.0%
Percent of Interstate pavements in good condition	60.0%	60.0%
Percent of Interstate pavements in poor condition	5.0%	5.0%
Percent of non-Interstate pavements in good condition	40.0%	40.0%
Percent of non-Interstate pavements in poor condition	5.0%	5.0%

For comparative purposes, the baseline (2021) conditions are as follows:

- 61.3 percent of NHS bridges (by deck area) is in good condition and 0.5 percent is in poor condition.
- 70.5 percent of the Interstate pavement is in good condition and 0.7 percent is in poor condition;
- 47.5 percent of the non-Interstate NHS pavement is in good condition and 1.1 percent is in poor condition; and

In determining its approach to establishing performance targets for the federal bridge and pavement condition performance measures, FDOT considered many factors. FDOT is mandated by Florida Statute 334.046 to preserve the state's bridges and pavement to specific state-defined standards. To adhere to the statutory guidelines, FDOT prioritizes funding allocations to ensure the current transportation system is adequately preserved and maintained before funding is allocated for capacity improvements. These state statutory guidelines envelope the statewide federal targets that have been established for pavements and bridges.

In addition, FDOT develops a Transportation Asset Management Plan (TAMP) for all NHS pavements and bridges within the state. The TAMP must include investment strategies leading to a program of projects that would make progress toward achievement of the State's targets for asset condition and performance of the NHS. FDOT's first TAMP was approved on June 28, 2019. The TAMP has since been updated in 2022 and is waiting final approval from FHWA.

Further, the federal pavement condition measures require a methodology that is different from the methods historically used by FDOT. For bridge condition, the performance is measured in deck area under the federal measure, while FDOT programs its bridge repair or replacement work on a bridge-by-bridge basis. As such, the federal measures are not directly comparable to the methods that are most familiar to FDOT. For pavement condition, the methodology uses different ratings and pavement segment lengths, and FDOT only has one year of data available for non-Interstate NHS pavement using the federal methodology.

FDOT collects and reports bridge and pavement data to FHWA each year to track performance and progress toward the targets. The percentage of Florida's bridges in good condition is slowly decreasing, which is to be expected as the bridge inventory grows older. Reported bridge and pavement data through 2021 exceeded the

established targets. Based on anticipated funding levels, FDOT believes the previous targets are still appropriate for 2023 and 2025.

In early 2021, FHWA determined that FDOT made significant progress toward the 2019 targets; FHWA's assessment of progress toward the 2021 targets is anticipated to be released in March 2023.

#### 4.1.2 MPO Targets

MPOs must set four-year targets for the six bridge and pavement condition measures within 180 days of when FDOT established targets. MPOs can either agree to program projects that will support the statewide targets or establish their own quantifiable targets for the MPO's planning area for one or more measures.

On February 9, 2023, the North Florida TPO agreed to support FDOT's statewide bridge and pavement performance targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets.

#### 4.2 Bridge & Pavement Investments in the TIP

The North Florida TPO TIP reflects investment priorities established in Path Forward, the 2045 LRTP. The focus of the North Florida TPO's investments in bridge and pavement condition include bridge replacement and reconstruction, new bridge capacity on the NHS, system resiliency projects, pavement reconstruction on the NHS and new lanes and widening on the NHS. Bridge and pavement investments in the TIP support Goal 6 of the LRTP as shown below:

#### GOAL 6: PRESERVE AND MAINTAIN OUR EXISTING SYSTEM

Preserving and maintaining the existing system is integral to the optimization of mobility. The Federal Highway Administration (FHWA) and Florida Department of Transportation (FDOT) established formal goals and objectives for systems preservation that are proposed for adoption as part of this LRTP. They include:

- 1. Have 95 percent of the Strategic Intermodal System in good or better condition.
- 2. Have 85 percent of other arterials in good or better condition.
- 3. Strengthen bridges that are either (1) structurally deficient or (2) posted for weight restriction within six years on FDOT facilities.
- 4. Replace bridges that require structural repair and are more cost effective to replace within nine years on FDOT facilities.
- 5. Satisfy FDOT's off system bridge replacement goals.
- 6. Maintain signing and pavement markings to accommodate all users including automated vehicles.
- 7. Maintain technology/infrastructure introduced to accommodate connected vehicles

In addition, the objective of the systems preservation and maintenance goal is to provide a transit fleet that meets Federal Transit Administration's (FTA's) requirements for system preservation, vehicle age and maintenance.

The TIP devotes a significant amount of resources to projects that will maintain bridge and pavement condition performance. Investments in bridge and pavement condition include bridge replacement and reconstruction, pavement replacement and reconstruction, and new bridge and pavement capacity. The TIP will fund \$404 million for bridges, \$584 million for resurfacing, and \$885 million for new capacity.

The projects included in the TIP are consistent with FDOT's Five Year Work Program, and therefore to FDOT's approach to prioritize funding to ensure the transportation system is adequately preserved and maintained. Per federal planning requirements, the state selects projects on the NHS in cooperation with the MPO from the approved TIP. Given the significant resources devoted in the TIP to pavement and bridge projects, the MPO anticipates that once implemented, the TIP will contribute to progress towards achieving the statewide pavement and bridge condition performance targets.

The North Florida TPO supports District 2's bridge and pavement decisions reflected in the Work Program and TIP with projects in Clay, Duval, Nassau and St. Johns Counties. These projects include the following:

#### Clay County Bridge and Pavement Projects

# 5 - SYSTEM PERFORMANCE, FREIGHT, & CONGESTION MITIGATION & AIR QUALITY IMPROVEMENT PROGRAM MEASURES (PM3)

FHWA's System Performance/Freight/CMAQ Performance Measures Final Rule, which is referred to as the PM3 rule, requires state DOTs and MPOs to establish targets for the following six performance measures:

#### National Highway Performance Program (NHPP)

- 1. Percent of person-miles traveled on the Interstate system that are reliable
- 2. Percent of person-miles traveled on the non-Interstate NHS that are reliable;

#### National Highway Freight Program (NHFP)

3. Truck Travel Time Reliability index (TTTR);

#### Congestion Mitigation and Air Quality Improvement Program (CMAQ)

- 4. Annual hours of peak hour excessive delay per capita (PHED);
- 5. Percent of non-single occupant vehicle travel (Non-SOV); and
- 6. Cumulative 2-year and 4-year reduction of on-road mobile source emissions (NOx, VOC, CO, PM10, and PM2.5) for CMAQ funded projects.

Because all areas in Florida meet current national air quality standards, the three CMAQ measures do not apply in Florida. A description of the first three measures is below.

The first two performance measures assess the percent of person-miles traveled on the Interstate or the non-Interstate NHS that are reliable. Reliability is defined as the ratio of longer travel times to a normal travel time over of all applicable roads, across four time periods between the hours of 6 a.m. and 8 p.m. each day.

The third performance measure assesses the reliability of truck travel on the Interstate system. The TTTR assesses how reliable the Interstate network is by comparing the worst travel times for trucks against the travel time they typically experience.

#### 5.1 System Performance and Freight Targets

#### 5.1.1 Statewide Targets

Federal rules require state DOTs to establish two-year and four-year targets for the system performance and freight targets. On December 16, 2022, FDOT established statewide performance targets for the second performance period ending in 2025. These targets are identical to those set for 2019 and 2021, respectively. Florida's performance through 2021 exceeds the targets. The two-year targets represent performance at the end of calendar year 2023, while the four-year targets represent performance at the end of 2025. Table 5.1 presents the statewide targets.

Table 5.1. Statewide System Performance and Freight Targets

Performance Measure	2023 Statewide Target	2025 Statewide Target
Percent of person-miles traveled on the Interstate system that are reliable	75.0%	70.0%
Percent of person-miles traveled on the non-Interstate NHS that are reliable	50.0%	50.0%
Truck travel time reliability (Interstate)	1.75	2.00

For comparative purposes, baseline (2021) statewide conditions are as follows:

- 87.5 percent of person-miles traveled on the Interstate are reliable;
- 92.9 percent of person-miles traveled on the non-Interstate are reliable; and
- 1.38 truck travel time reliability index.

In establishing these targets, FDOT reviewed external and internal factors that may affect reliability, analyzed travel time data from the National Performance Management Research Dataset (NPMRDS), and developed a sensitivity analysis indicating the level of risk for road segments to become unreliable.

FDOT collects and reports reliability data to FHWA each year to track performance and progress toward the reliability targets. Performance for all three measures improved from 2017 to 2021, with some disruption in the trend during the global pandemic in 2020. Actual performance in 2019 was better than the 2019 targets, and in early 2021 FHWA determined that FDOT made significant progress toward the 2019 targets. FHWA's assessment of progress toward the 2021 targets is anticipated to be released in March 2023.

The methodologies for the PM3 measures are still relatively new, and the travel time data source has changed since the measures were first introduced. As a result, FDOT only has three years (2017-2019) of pre-pandemic travel reliability trend data as a basis for future forecasts. Based on the current data, Florida's performance continues to exceed the previous targets. Given the uncertainty in future travel behavior, FDOT believes the previous targets are still appropriate for 2023 and 2025.

System performance and freight are addressed through several statewide initiatives:

• Florida's Strategic Intermodal System (SIS) is composed of transportation facilities of statewide and interregional significance. The SIS is a primary focus of FDOT's capacity investments and is Florida's primary network for ensuring a strong link between transportation and economic competitiveness. These facilities, which span all modes and includes highways, are the workhorses of Florida's transportation system and account for a dominant share of the people and freight movement to, from and within Florida. The SIS includes 92 percent of NHS lane miles in the state. Thus, FDOT's focus on improving performance of the SIS goes hand-in-hand with improving the NHS, which is the focus of the FHWA's TPM program. The SIS Policy Plan was updated in early 2022 consistent with the updated FTP. The SIS Policy Plan defines the policy framework for designating which facilities are part of the SIS, as well as how SIS investments needs are identified and prioritized. The development of the SIS Five-Year Plan by

FDOT considers scores on a range of measures including mobility, safety, preservation, and economic competitiveness as part of FDOT's Strategic Investment Tool (SIT).

- In addition, FDOT's Freight Mobility and Trade Plan (FMTP) defines policies and investments that will enhance Florida's economic development efforts into the future. The FMTP identifies truck bottlenecks and other freight investment needs and defines the process for setting priorities among these needs to receive funding from the National Highway Freight Program (NHFP). Project evaluation criteria tie back to the FMTP objectives to ensure high priority projects support the statewide freight vision. In May 2020, FHWA approved the FMTP as FDOT's State Freight Plan.
- FDOT also developed and refined a methodology to identify freight bottlenecks on Florida's SIS on an
  annual basis using vehicle probe data and travel time reliability measures. Identification of bottlenecks and
  estimation of their delay impact aids FDOT in focusing on relief efforts and ranking them by priority. In
  turn, this information is incorporated into FDOT's SIT to help identify the most important SIS capacity
  projects to relieve congestion.

#### 5.1.2 MPO Targets

MPOs must establish four-year targets for all three performance measures. MPOs can either agree to program projects that will support the statewide targets or establish their own quantifiable targets for the MPO's planning area for one or more measures.

On February 9, 2023, the North Florida TPO agreed to support FDOT's statewide system performance and freight targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets.

## 5.2 System Performance and Freight Investments in the TIP

The North Florida TPO has a long history of investing in technology to improve system performance. The TPO has upgraded signal controllers throughout the region, procured BlueToad devices to monitor the performance of major arterials throughout the region, paid for the installation of wind sensors on bridges throughout the region and funded construction of the regional transportation management center. Real-time data is available to the public on the TPO's website and to public and private agencies.

Since 2014 and the completion of the 2013 Congestion Management Process (CMP) the North Florida TPO has reported annually on progress made in achieve performance measures adopted in the CMP. The 2019 CMP, Path Forward 2045 and the Regional System Safety Plan which were also adopted in 2019 all included the Federal performance measures and FDOT/North Florida TPO targets. Progress made is reported in subsequent Annual Mobility Reports.

The TIP devotes a significant amount of resources to programs and projects that will improve system performance and freight reliability on the Interstate and non-Interstate NHS. Investments include corridor improvements, intersection improvements, mode shift investments, managed lanes, freight improvements, TSMO/ITS projects and travel demand management programs. The TIP will fund \$31 million for intersection improvements, \$936 million for congestion relief projects, \$1.7 billion for freight-related projects, \$6 million for managed lanes, and \$86 million for TSMO projects.

The North Florida TPO TIP reflects investment priorities established in Path Forward, the 2045 LRTP. The focus of the North Florida TPO's investments that address system performance and freight include the following:

The projects included in the TIP are consistent with FDOT's Five Year Work Program, and therefore to FDOT's approach to prioritize funding to address performance goals and targets. Per federal planning requirements, the state selects projects on the NHS in cooperation with the MPO from the approved TIP. Given the significant resources devoted in the TIP to programs that address system performance and freight, the MPO anticipates that once implemented, the TIP will contribute to progress towards achieving the statewide reliability performance targets.

# 6 - TRANSIT ASSET MANAGEMENT MEASURES

#### **Transit Asset Performance Measures**

FTA's Transit Asset Management (TAM) regulations apply to all recipients and subrecipients of Federal transit funding that own, operate, or manage public transportation capital assets. The regulations define the term "state of good repair," require that public transportation providers develop and implement TAM plans, and established state of good repair standards and performance measures for four asset categories: equipment, rolling stock, transit infrastructure, and facilities. Table 6.1 identifies the TAM performance measures.

**Table 6.1. FTA TAM Performance Measures** 

Asset Category		Performance Measure
1.	Equipment	Percentage of non-revenue, support-service and maintenance vehicles that have met or exceeded their Useful Life Benchmark
2.	Rolling Stock	Percentage of revenue vehicles within a particular asset class that have either met or exceeded their Useful Life Benchmark
3.	Infrastructure	Percentage of track segments with performance restrictions
4.	Facilities	Percentage of facilities within an asset class rated below condition 3 on the TERM scale

For equipment and rolling stock classes, useful life benchmark (ULB) is defined as the expected lifecycle of a capital asset, or the acceptable period of use in service, for a particular transit provider's operating environment. ULB considers a provider's unique operating environment such as geography, service frequency, etc.

Public transportation providers are required to establish and report TAM targets annually for the following fiscal year. Each public transportation provider or its sponsors must share its targets with each MPO in which the public transportation provider's projects and services are programmed in the MPO's TIP. MPOs are not required to establish TAM targets annually each time the transit provider establishes targets. Instead, MPO targets must be established when the MPO updates the LRTP (although it is recommended that MPOs reflect the most current transit provider targets in the TIP if they have not yet taken action to update MPO targets). When establishing TAM targets, the MPO can either agree to program projects that will support the transit provider targets or establish its own separate regional TAM targets for the MPO planning area. MPO targets may differ from agency targets, especially if there are multiple transit agencies in the MPO planning area. To the maximum extent practicable, public transit providers, states, and MPOs must coordinate with each other in the selection of performance targets.

The TAM regulation defines two tiers of public transportation providers based on size parameters. Tier I providers are those that operate rail service, or more than 100 vehicles in all fixed route modes, or more than 100 vehicles in one non-fixed route mode. Tier II providers are those that are a subrecipient of FTA 5311 funds, or an American Indian Tribe, or have 100 or less vehicles across all fixed route modes or have 100 or less vehicles in one non-fixed route mode. A Tier I provider must establish its own TAM targets, as well as report performance and other data to FTA. A Tier II provider has the option to establish its own targets or

to participate in a Group Plan with other Tier II providers whereby targets are established for the entire group in coordination with a group plan sponsor, typically a state DOT.

## 6.1 FDOT Group TAM Plan Participants

A total of 18 public transportation providers participated in the FDOT Group TAM Plan and continue to coordinate with FDOT on establishing and reporting group targets to FTA through the National Transit Database (NTD) (Table 6.2). These are FDOT's Section 5311 Rural Program subrecipients. The Group TAM Plan was adopted in September 2022 and covers fiscal years 2022-2023 through 2025-2026. Group TAM Plan targets for fiscal year 2022 were submitted to NTD in July 2022. The TPO boundary includes the Nassau County Council on Aging/Nassau TRANSIT as identified in Table 6.2.

7	No participating providers			

<sup>\*</sup>Provider service area covers portions of Districts 2 and 3.

#### 6.2 Transit Asset Management Targets

The following providers operate in the MPO planning area: Jacksonville Transportation Authority (JTA), St. Johns County Sunshine Bus, and Nassau County Transit. JTA and St. Sunshine Bus are considered Tier I providers and, as such, each must develop a TAM Plan. Nassau County Transit is considered a Tier II provider and is included in the group TAM plan developed by the FDOT Public Transit Office in Tallahassee. JTA also provides transit service in Clay County as the Community Transportation Coordinator for that county.

#### 6.2.1 Transit Provider Targets

The Jacksonville Transportation Authority (JTA) established TAM targets for each of the applicable asset categories on February 14, 2019. Table 6.3a presents the targets currently listed in their Transit Asset Management Plan. The St. Johns County Sunshine Bus established TAM targets for each of the applicable asset categories on October 20, 2018. Table 6.3b presents the targets.

Nassau County Council on Aging/Nassau TRANSIT is part of the Group TAM Plan for Fiscal Years 2018/2019-2021/2022 developed by FDOT for Tier II providers in Florida. The FY 2020 asset conditions and FY 2021 targets for the Tier II providers are shown in Table 6.4.

The transit provider's TAM targets are based on the condition of existing transit assets and planned investments in equipment, rolling stock, infrastructure, and facilities. The targets reflect the most recent data available on the number, age, and condition of transit assets, and capital investment plans for improving these assets. The table summarizes both existing conditions for the most recent year available, and the current targets.

Table 6.3a. Transit Asset Management Targets for Jacksonville Transportation Authority

Asset Category - Performance Measure	Asset Class	FY 2022 Asset Condition	FY 2023 Target
Equipment			
	Automobile	100%	100%
	Trucks and Other Rubber Tire Vehicles	60%	58%
Age - % of non-revenue service vehicles exceeds UL of 4yrs or 100,000 miles	SUVs	42%	41%
	Trucks	85%	76%
	Vans	100%	100%
% of non-revenue service vehicles exceeds UL of 18yrs	Boats	100%	100%
Rolling Stock			
Age - % of fleet exceeds UL of 12 yrs or 500,000 miles	Buses (JTA/CC)	17%	18%
Age - % of fleet exceeds UL of 5 yrs or 150,000 miles	Cutaways (JTA/CC)	62%	67%
Age - % of fleet exceeds UL of 4 yrs or 100,000 miles	Vans (JTA/CC)	33%	25%
Age - % of fleet exceeds UL of 25 yrs	Automated Guideway Vehicle	0%	0%
	Ferryboat	0%	0%

Asset Category - Performance Measure	Asset Class	FY 2022 Asset Condition	FY 2023 Target
% of track segments under performance restriction	Rail Fixed Guideway	1%	8%
Facilities			
	Admin/Maintenance Facilities	0%	0%
Condition - % of facilities rated under 3.0 on TERM scale	Passenger/Parking Facilities	3%	3%
	Passenger Facilities	0%	0%
	Parking Facilities	4%	4%

Table 6.3.b St. Johns County Sunshine Bus Transit Asset Targets and Measures

Performance Targets & Measures					
Asset Category - Performance Measure	Asset Class	2020 Target	2020 Performance	2021 Target	2021 Performance
Percent of revenue vehicles that have	CU - Cutaway Bus	39%	12.9%	65%	-0/0
met or exceeded their useful life benchmark	MV - Mini-van	40%	0%	50%	-%
Percent of vehicles that have met or exceeded their Useful Life Benchmark (ULB)	Non- Revenue/Service Automobile	100%	100%	100%	-%
Percent of facilities rated below 3 on the condition scale	Administrative / Maintenance Facilities	0%	0%	0%	0%

Table 6.4. FDOT Group Plan Transit Asset Management Targets for Tier II Providers

Asset Category - Performance Measure	Asset Class	FY 2021 Asset Conditions	FY 2022 Performance Target
Revenue Vehicles			
	Automobile	0%	0%
	Bus	21.54%	20.46%
Age - % of revenue vehicles within a	Cutaway Bus	9.81%	9.32%
particular asset class that have met or exceeded their Useful Life Benchmark	School Bus	100.0%	95%
(ULB)	Mini-Van	19.59%	18.61%
	SUV	20%	19%
	Van	40.58%	38.55%
Equipment			
Age - % of equipment or non-revenue vehicles within a particular asset class that	Non-Revenue Automobile	75%	71.25%
have met or exceeded their Useful Life Benchmark (ULB)	Trucks and other Rubber Tire Vehicles	6.25%	5.94%
Facilities			
Condition - % of facilities with a condition rating below 3.0 on the FTA Transit	Passenger/Parking Facilities	0%	0%
Economic Requirements Model (TERM) Scale	Administration/ Maintenance Facilities	6.67%	6.34%

#### 6.2.2 MPO Transit Asset Management Targets

As discussed above, MPOs are not required to establish TAM targets annually each time the transit provider establishes targets. Instead, MPO's must revisit targets each time the MPO updates the LRTP. MPOs can either agree to program projects that will support the transit provider targets or establish separate regional TAM targets for the MPO planning area. MPO targets may differ from agency targets, especially if there are multiple transit agencies in the MPO planning area.

On October 11, 2018 the North Florida TPO agreed to support St. Johns County Sunshine Bus and Tier II transit agencies asset targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the provider's targets.

On February 14, 2019 the North Florida TPO agreed to support the JTA's TAM targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the provider's targets.

#### 6.3 Transit Asset Management Investments in the TIP

The North Florida TPO TIP was developed and is managed in cooperation with JTA, St. Johns County Sunshine Bus, and Nassau County Transit. It reflects the investment priorities established in the Path Forward 2045, the adopted Long Range Transportation Plan. The investments in this TIP reflect the TPO's commitment to addressing transit asset age and performance measures.

FTA funding, as programmed by the region's transit providers and FDOT, is used for programs and products to improve the condition of the region's transit assets. The focus of the North Florida TPO's investments that address transit state of good repair include bus and other vehicle purchases and replacement, equipment purchases and replacements, retrofits and repair, rehabilitation, and replacement of transit facilities and infrastructure.

To assist the Tier 1 providers in meeting their TAM targets the North Florida TPO provides the following financial assistance annually:

- FM 4067899 St Johns County BCC STP funds for Purchase of Buses/Equipment (\$375,000)
- FM 2159233 JTA/STP Funds Duval County Purchase Buses/Equipment (\$1,125,000)

Additionally, the following projects are programmed in the TIP to aid in meeting transit asset management targets:

		Active

	CITY OF ST. AUGUSTINE DOWNTOWN			URBAN CORRIDOR
2164533	CIRCULATOR PHASE I	\$3,000,000	ST. JOHNS	IMPROVEMENTS

Transit asset condition and state of good repair is a consideration in the methodology the North Florida TPO uses to select projects for inclusion in the TIP. The TIP includes specific investment priorities that support all of the MPO's goals, including transit state of good repair, using a prioritization and project selection process established in the LRTP. This process evaluates projects that, once implemented, are anticipated to improve transit state of good repair in the MPO's planning area. This prioritization process considers factors such as useful life benchmarks and maintain a state of good repair. To support progress towards TAM performance targets, transit investment and maintenance funding in the LRTP Path Forward 2045 accounted for approximately 15.5 percent of total LRTP funding (not including SIS funding) and 35 percent of requested Jacksonville Transportation Authority funding for transit preservation. Improving the State of Good Repair (SGR) of capital assets is an overarching goal of this process.

The TIP devotes resources to projects that will maintain and improve transit state of good repair. Investments in transit assets in the TIP include \$150 million for vehicle and facility improvements.

The North Florida TPO TIP has been evaluated and the anticipated effect of the overall program is that, once implemented, progress will be made towards achieving the TAM performance targets. The North Florida TPO will continue to coordinate with the JTA, St. Johns County Sunshine Bus and Nassau County Transit to maintain the region's transit assets in a state of good repair. For more information on these programs and projects, see sections B, E and G of the main TIP document.

Investment decisions for asset replacement in the FDOT Group TAM Plan inventory are made with the goal to maintain or improve the percentage of vehicles, equipment, and facilities in an adequate or better condition. FDOT and its subrecipient transit providers will monitor all assets for unsafe conditions. Identifying an opportunity to improve the safety of an asset, however, does not necessarily indicate an unsafe condition. If an unacceptable safety risk associated with an asset is identified, that asset will be ranked with higher investment priority to the extent practicable. The subrecipients prioritize the rehabilitation and replacement of vehicles that provide transit service over non-revenue vehicles and facilities.

#### 7 - TRANSIT SAFETY PERFORMANCE

FTA's Public Transportation Agency Safety Plan (PTASP) regulations established transit safety performance management requirements for providers of public transportation systems that receive federal financial assistance under 49 U.S.C. Chapter 53.

The regulations apply to all operators of public transportation that are a recipient or sub-recipient of FTA Urbanized Area Formula Grant Program funds under 49 U.S.C. Section 5307, or that operate a rail transit system that is subject to FTA's State Safety Oversight Program. The PTASP regulations do not apply to certain modes of transit service that are subject to the safety jurisdiction of another Federal agency, including passenger ferry operations regulated by the United States Coast Guard, and commuter rail operations that are regulated by the Federal Railroad Administration.

The PTASP must include performance targets for the performance measures established by FTA in the National Public Transportation Safety Plan, which was published on January 28, 2017. The transit safety performance measures are:

- Total number of reportable fatalities and rate per total vehicle revenue miles by mode.
- Total number of reportable injuries and rate per total vehicle revenue miles by mode.
- Total number of reportable safety events and rate per total vehicle revenue miles by mode.
- System reliability mean distance between major mechanical failures by mode.

In Florida, each Section 5307 or 5311 public transportation provider must develop a System Safety Program Plan (SSPP) under Chapter 14-90, Florida Administrative Code. FDOT technical guidance recommends that Florida's transit agencies revise their existing SSPPs to be compliant with the new FTA PTASP requirements.<sup>1</sup>

Each public transportation provider that is subject to the PTASP regulations must certify that its SSPP meets the requirements for a PTASP, including transit safety targets for the federally required measures. Providers were required to certify their initial PTASP and safety targets by July 20, 2021. Once the public transportation provider establishes safety targets it must make the targets available to MPOs to aid in the planning process. MPOs are not required to establish transit safety targets annually each time the transit provider establishes targets. Instead, MPO targets must be established when the MPO updates the LRTP (although it is recommended that MPOs reflect the current transit provider targets in their TIPs). When establishing transit safety targets, the MPO can either agree to program projects that will support the transit provider targets or establish its own separate regional transit safety targets for the MPO planning area. In addition, the North Florida TPO must reflect those targets in LRTP and TIP updates.

41

<sup>&</sup>lt;sup>1</sup> FDOT Public Transportation Agency Safety Plan Guidance Document for Transit Agencies. Available at <a href="https://www.fdot.gov/transit/default.shtm">https://www.fdot.gov/transit/default.shtm</a>

#### 7.1 Transit Safety Targets

The following public transportation provider(s) operate in the North Florida TPO planning area: JTA, St. Johns County Sunshine Bus, and Nassau County Transit. Of these, JTA and St. Johns County Sunshine Bus are responsible for developing a PTASP and establishing transit safety performance targets annually.

#### 7.1.1 Transit Agency Safety Targets

The JTA and St. Johns County/Sunshine Bus both established the transit safety targets identified in Table 7.1 in July 2020. These targets are updated or affirmed annually. The values displayed in the Table reflect the latest annual update from July 2022.

Table 7.1. Transit Safety Performance Targets for JTA and St. Johns County/Sunshine Bus

Transit Mode	Fatalities (total)	Fatalities (rate)	Injuries (total)	Injuries (rate)	Safety Events (total)	Safety Events (rate)	System Reliability
		Jacksonvill	e Transpor	rtation Autl	nority		
Fixed Route Bus	0	0	63	0.6	365	3.5	20,000 VRM
ADA/Paratransit	0	0	9	0.2	190	4	27,500 VRM
Rail	0	0	4	3	16	12	9,440 VRM
Ferry	0	0	1	NA	1	NA	NA
		St. John	s County/S	Sunshine B	us		
Fixed Route Bus	0	0	5	0.5	10	0.9	0.5
Paratransit	0	0	8	1.04	5	0.65	0.75

#### 7.1.2 MPO Transit Safety Targets

As discussed above, MPOs are not required to establish transit safety targets annually each time the transit provider establishes targets. Instead, MPO's must revisit targets each time the MPO updates the LRTP. MPOs can either agree to program projects that will support the transit provider targets or establish separate regional transit safety targets for the MPO planning area. MPO targets may differ from agency targets, especially if there are multiple transit agencies in the MPO planning area.

On October 8, 2020 the North Florida TPO agreed to support both the Jacksonville Transportation Authority and St. Johns County/Sunshine Bus transit safety targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the provider's targets

#### 7.2 Transit Safety Investments in the TIP

The North Florida TPO TIP was developed and is managed in cooperation with JTA, St. Johns County Sunshine Bus, and Nassau County Transit. It reflects the investment priorities established in the Path Forward 2045 LRTP.

FTA funding, as programmed by the region's transit providers and FDOT, is used for programs and products to improve the safety of the region's transit systems. The focus of the North Florida TPO's investments that address transit safety include the following projects:

ID	Description	Active Funding	County	Work Type
	JACKSONVILLE JTA STATE BLOCK GRANT			OPERATING FOR
4117591	OPERATING FUNDS	\$53,274,416	DUVAL	FIXED ROUTE
	ST.JOHNS CNTY FED 5307 OPERATING			OPERATING FOR
4067898	GRANT	\$20,000,000	ST. JOHNS	FIXED ROUTE
	5310 OPERATING ASSISTANCE FOR ST.			OPERATING FOR
4358651	JOHNS COUNCIL ON AGING (COA)	\$326,426	ST. JOHNS	FIXED ROUTE
	ST. JOHNS COUNTY BLOCK GRANT			OPERATING FOR
4184411	OPERATING FUNDS	\$6,728,932	ST. JOHNS	FIXED ROUTE
				URBAN CORRIDOR
4453331	JTA BLUE LINE FLEX ROUTE - OPERATIONS	\$570,000	DUVAL	IMPROVEMENTS
				URBAN CORRIDOR
4453332	JTA RED LINE FLEX ROUTE - OPERATIONS	\$352,000	DUVAL	IMPROVEMENTS
	JTA CLAY EXPRESS SELECT ROUTE -			URBAN CORRIDOR
4462162	OPERATIONS	\$810,500	DUVAL	IMPROVEMENTS

Transit safety is a consideration in the methodology the North Florida TPO uses to select projects for inclusion in the TIP. The TIP includes specific investment priorities that support all of the MPO's goals, including transit safety, using a prioritization and project selection process established in the LRTP. This process evaluates projects that, once implemented, are anticipated to improve transit safety in the MPO's planning area. This prioritization process is primarily driven by the strong partnership with the TPO's regional transit agencies. These agencies are included in the TPO's board and committees and have strong influence over the TIP development and LRTP direction.

The North Florida TPO TIP has been evaluated and the anticipated effect of the overall program is that, once implemented, progress will be made towards achieving the transit safety performance targets. The North Florida TPO will continue to coordinate with the JTA, St. Johns County Sunshine Bus, and Nassau County Transit to maintain and improve the safety of the region's transit system and maintain transit assets in a state of good repair.

The TIP devotes resources to projects that will maintain and improve transit safety. Investments in transit safety in the TIP include \$82 million for operating and safety programs and projects. For more information on these programs and projects, see sections B, E and G of the main TIP document.
